

About Block Resource Centre

Drinking Water and Sanitation Department (DWSD), Government of Jharkhand implements two flagship program entitled National Rural Drinking Water Program (NRDWP) and Nirmal Bharat Abhiyan (NBA) to implement Water and Sanitation Sector program in Jharkhand. Select Non-Government Organizations is engaged by DWSD as Block Resource Centre (BRC) to provide continuous support to Gram Panchayat (GP)/ Village Water and sanitation Committee (VWSC) for community mobilization, awareness generation, and training and associated professional activities.

To perform its duties every BRC works through a team of Block Coordinator and Cluster Coordinator duly appointed by the NGO responsible for Block Resource Centre. It has been decided that for the first Six month BRCs shall be engaged in Sanitation Work to facilitate achieving ‘Open Defecation Free’ status for villages as per Annual Implementation Plan (AIP) of DWSD leading to creation of Nirmal Gram Panchayet. The diary is designed in accordance with this decision and is suggested for use in the first and second quarter of 2013-14.

Directions for Using the Diary

- A. This diary shall be maintained by all the Block Coordinators/ Cluster Coordinators appointed by Block Resource Centre (BRC) and act as a tool for recording their daily work.
- B. By the end of the month the diary shall be verified by supervisor for monitoring and evaluation of work done by the Coordinators and compile district wise progress Monthly Progress Report.
- C. Remuneration of the Coordinators shall be released after performance evaluation on submission of the Diary.

SECTION 1: NIRMAL BHARAT ABHIYAN

1.1 Total Sanitation Campaign was the key sanitation sector initiative by Government of India during 10th and 11th 5 year Plan. Under Total Sanitation Campaign (TSC) concept of Nirmal Gram Panchayet (NGP) i.e. Open Defecation Free Panchayets received good response across the states of India. Encouraged by the success of NGP; TSC is being renamed as “Nirmal Bharat Abhiyan” (NBA). NBA aims to accelerate sanitation coverage in rural areas to achieve the vision of Nirmal Bharat by 2022 with all gram Panchayats in the country attaining Nirmal status through

- A. Awareness creation and health education
- B. Encouraging cost effective and appropriate technologies for ecologically safe and sustainable sanitation
- C. Developing community managed environmental sanitation systems focusing on solid & liquid waste management for overall cleanliness in the rural areas.

1.2 The program envisages covering the entire community for saturated outcomes with a view to create Nirmal Gram Panchayats with following priorities:

- a. Provision of Individual Household Latrine (IHHL) of both Below Poverty Line (BPL) and Identified above Poverty Line (APL) households within a Gram Panchayat (GP).
- b. Gram Panchayats where all habitations have access to water to be taken up. Priority may be given to Gram Panchayats having functional piped water supply.
- c. Provision of sanitation facilities in Government Schools and Anganwadis in Government buildings within these GPs.
- d. Solid and Liquid Waste Management (SLWM) for proposed and existing Nirmal Grams.
- e. Extensive capacity building of the stake holders like Panchayati Raj Institutions (PRIs), Village Water and Sanitation Committees (VWSCs) and field functionaries for sustainable sanitation.
- f. Appropriate convergence with MNREGS with unskilled man-days and skilled man-days.

SECTION 2: STATUS OF WATER & SANITATION IN JHARKHAND

2.1 State at a Glance

Districts : 24

Blocks : 259

Gram Panchayat : 4562

Villages : 29273

Habitations : 119191

[SC : 16588 (13.92%)]

[ST : 64322 (53.97%)] [Others : 38281 (32.12 %)]

Rural Population (In Crore) : 2.47

[SC : 0.31 (12.66 %)]

[ST : 0.83 (33.46 %)] [GEN : 1.33 (53.88 %)]

Cov. Population (In Crore) : 2.26

[SC : 0.28 (88.39 %)] [ST : 0.79 (95.42 %)] [GEN : 1.19 (89.91 %)]

Population Managing Water Supply Scheme : 3.04%

Stage of Ground Water Development : 21 %

| PC (Nos.) | 0 | 0 | 0 |
| Financial (Rs. in lakh) | 2549.88 | 313.33 | 12.29 |
| Growth Rate (in percentage) | | | |
| January-2001 (Census) | 3/1/2003 | 4/1/2010 | 3/1/2017 |
| 7.45 | 7.45 | 48.6 | 64.58 |
| Total number of households in Census 2001 Data :343.875 Thousands | | | |
| Total number of households covered in Census 2001 data :25.624 Thousands | | | |
| Total number of households covered so far (Census + NBA + NonNBA) :167.137 Thousands | | | |
| Current growth rate per year (Coverage percentage in 2010-Coverage percentage upto March 2003)/Time Duration :4.08 % | | | |
| Required growth rate per year to complete 100% of target by 2017 :13.12 % | | | |
| With this current growth rate, only 64.58 % target will be achieved upto March 2017. | | | |
| With this current growth rate 100% target will be achieved in :2026 | | | |

SECTION 3: STRATEGY FOR ACHIEVING OPEN-DEFECATION-FREE VILLAGES IN JHARKHAND¹:

3.1 Learning from Previous Programs

Learning from the erstwhile Total Sanitation Campaign (TSC) has very clearly indicated that results in implementation of the sanitation programme could not ensure sustainability due to the following factors:

- A. The programme was implemented in a supply driven mode although the policy prescribed a demand driven approach; the users were rarely consulted before and while providing the toilet structure
- B. The programme was target driven and hence proper construction became a lesser priority and the focus shifted to coverage at any cost
- C. Most people who did not use the toilet even after being provided with the facility complained that the quality of the infrastructure/ construction was the most significant deterrent and
- D. Finally, we withdrew our programmes from the field as soon as we achieved (100%) coverage; it was possibly imperative that we engage with the community during the post construction phase

3.2 Improvement made in NBA

In order to address these issues, the Drinking Water and Sanitation Department adopted a strategy wherein the following salient features figured:

- A. To ensure sustainability highest quality of sanitary toilets in adherence to the specifications of the NBA will be made available
- B. In order to shift from a supply and target driven, subsidy funds will be provided only after attainment of ODF status
- C. The technical agency involved will be engaged with the community for many years after the ODF status is attained; significantly the recently appointed BRCs will play that role

However, this strategy was being thwarted by the fact that in most villages there were several households who were beneficiaries of the earlier TSC programme and would therefore not be eligible for the NBA subsidies. This shall be addressed in the following manner.

¹Based on the experience of Gadri Village (NehaluKapadia Gram Panchayat), Bero Block - Ranchi

3.3 Provision of Revolving Fund to VWSC

In Item 6.2 of the Nirmal Bharat Abhiyan Guideline of the Government of India, there is a provision for accessing Revolving Funds (interest free soft loan recoverable within 12-18 months period) from the District Water and Sanitation Mission. Each district can provide revolving funds to eligible institutions/agencies. A district can provide Revolving funds up to a maximum amount of Rs. 50 lakhs. The key attributes of Revolving Fund Approach are:

- A. The Village Water and Sanitation Committee which is the core institution for programme implementation of the grassroots are eligible for accessing the Revolving fund. The Revolving Fund comes to the bank account of the VWSC as a lump sum amount as a seed capital/ incentive for attaining ODF for the village; Community as a whole has equal ownership of this amount.
- B. The VWSC in a meeting will commit for every household to have a sanitary toilet with superstructure as per technical specifications. Every household will have to maintain the basic minimum standard of quality of construction. Any additional investment on the toilet will be the as per the desire of the particular user household
- C. The community will calculate the total cost of toilet construction to make the village ODF; accordingly the community members will contribute to supplement the amount received through Revolving funds and mobilise the entire amount required for attaining ODF status
- D. After all the construction process is completed and the quality of construction is certified by the Mukhiya and VWSC, the village will be declared ODF. After 3 months of continuous use of the toilets and no reported open defecation the VWSC will claim the subsidy amount as provisioned under the NBA.

3.4 Implications

- A. Either the subsidy amount received by the VWSC is more than the amount received as Revolving fund – in which case the revolving fund can be easily returned or the excess fund can be kept in the VWSC account
- B. The subsidy amount received is less than the amount received as Revolving funds – in this case the additional funds will be generated from the community to pay back the loan, i.e., Revolving funds.

In case 3.4B, MNREGA funds can be a possible option for meeting the gap if the NBA subsidy is less than the amount received as Revolving funds. The labour component of the ODF activity shall be charged to MNREGA to pay back the loan.

SECTION 4: ANNUAL IMPLEMENTATION PLAN (AIP)

The main objective of the Annual Implementation Plan (AIP) is to provide a definite direction to the programme for creation of Nirmal Grams. It is also required to provide basis for monthly and quarterly monitoring of physical and financial progress during the course of the financial year vis-à-vis the planned activities. The AIP should include:

- a) Report on the progress made by the State in achieving the objectives of NBA during the previous year against the AIP objectives
- b) Reasons and comments for variation, if any;
- c) A plan of activities with physical and financial estimates under each component of the NBA for the proposed financial year.
- d) Monthly Quarterly projected targets
- e) Write ups of success stories, best practices, innovations introduced, new technologies used and AIP should be prepared by identification of Gram Panchayats to be saturated for attaining the project objectives. These GP plans should be consolidated into Block Implementation Plans and further into District Implementation Plan. The State Water and Sanitation Mission will suitably consolidate the District Implementation Plans as the State Implementation Plan.

The States/UTs shall prepare the AIP and submit the same before the commencement of the financial year on the basis of the balance works to be completed, to the Plan Approval Committee (PAC) of MoDWS for finalization.

AIP should be prepared following the saturation approach highlighting comprehensive sanitation and water coverage on the basis of identification of Gram Panchayats that can be made Nirmal during the year/in the coming years. The enlistment of Gram Panchayats should be done in a manner such that all the Gram Panchayats in a Block/District are covered progressively so as to make the State “Nirmal”. The AIP budgeting should follow the cost norms of NBA and should be compiled to project the financial demand of Central Share during the year.

SECTION 5: NBA FACILITATION ACTIVITY BY BRC

In order to establish Sanitation facilities, any easy operational mechanism best suited to the specific location with regard to individual beneficiaries' participation, arrangement of mason and construction material can be adopted by the BRCs. Operational mechanism of UNICEF is given hereunder for BRCs to facilitate them to formulate their own strategy of implementation. However, this mechanism is not mandatory and they can add more or modify this as per the requirement of field conditions.

5.1 General Guideline for Block resource Centre

- A. Initially a village level meeting will be conducted, ensuring the participation of all stakeholders i.e. the village community, PRIs and VWSC members. The objective of this meeting will be to ensure community participation and create demand generation over sanitation facilities.
- B. BRC will ensure the submission of the enclosed format to their concerned "PRAKAP". The BRC would facilitate the community members to fill the format (appropriately so as to cover all the necessary information).
- C. BRC will provide handholding support in the arrangement of Masons, material management and participation of beneficiary in toilet construction. However the final decision on these arrangements will be taken by the community itself and the role of the BRC will be to provide continuous support in every aspect of operation.
- D. Availability of Masons is an important aspect for effective and time frame management of the programme. BRC will always plan over this in advance by giving training to masons and their mobility in the operational areas where construction work is under progress.
- E. The target for one Mason will be to construct 10 toilets during the time span of one month. BRC will facilitate the village community in the procurement and management of construction material best suited to their locations and choice.
- F. However, a minimum quantitative requirement of materials must be conveyed by BRC to the Community i.e. an average of 600 bricks for one toilet, quantity of sand and chips as suggested by technical officials and the timely arrangement of Roof and Door by the beneficiary itself.
- G. BRC must ensure the beneficiaries participation either in the form of direct involvement as unskilled labour in toilet construction or by sharing his part of contribution i.e. Rs. 900. In order to ensure benefit of sanitation facilities to each and every individual, BRC must facilitate the availability of Revolving Fund to those individual not covered under the provisions of NBA.

5.2 Role & Function of Block Resource Centres: Facilitation at Village Level

The key task of the technical agency, in this case the BRC is to empower the Panchayats with knowledge about the government programme, facilitate the processes of community mobilisation and resource generation and ensure that the community is committed to achieve inclusive and sustainable results.

- A. BRC representative meet the VWSC and facilitate inclusive community level meetings wherein 100% community members are committed to achieve ODF status; this may take several consultations
- B. Initiate the process of collection of funds from the community by facilitating the President of the VWSC to apply for Revolving funds from the DWSC (in a prescribed format)
- D. Follow up with Member Secretary of DWSC to release funds to the VWSC (necessary to keep the SE in loop)
- E. Soon after receiving the Revolving fund from NBA, the BRC to facilitate the Mukhiya/ Rozgar Sevak to intimate the BPO (Block Programme Officer) for generating the Master Roll and other associated formalities to make payment for labour through MNREGA funds
- F. Ensure that trained masons, building materials, including pans and traps are available with the VWSC, and periodically review quality and progress of construction and labour payment status through MNREGA funds
- I. Declare ODF once all households are covered and Prepare DPR for mini piped water supply scheme in the same village; ensure that the community contributions for house connections are generated within 1 month of preparation of DPR
- K. After 3 months of continuous use of the toilets the VWSC will claim the NBA subsidy; BRC to track usage and ensure loans are paid back within 30 days if the subsidy amount for the village is more than the amount received through Revolving funds
- M. If the subsidy amount is less than the amount received through Revolving Funds the gap will be covered once again covered through community contribution with a time frame of 12 months
- N. The BRC will continue to engage with the VWSC for the following 2 years to ensure proper usage and develop healthy practices

4.2 Factors to be considered by BRC

A. The ODF must be done taking into consideration an entire Revenue Village; at the district level construction of toilets in different villages in a scattered manner should not be encouraged. We are no longer counting toilets – we are counting number of Open Defecation Villages

B. BRCs must be able to disseminate the message/ concept of total sanitation with involvement of all community members as the only option to secure health and dignity – building individual toilets will be futile if the entire community is not included in the movement

C. BRCs must be extremely efficient in (1) strengthening the VWSCs and (2) facilitating the pre-implementation meeting of the communities wherein 100% households participate, commit to achieve ODF and agree to contribute to the funds required to achieve ODF

D. IEC funds are devolved @ of 10% of the amount received as loan; the BRC must ensure that the IEC fund is expensed at the village level and according to a plan. The IEC fund is for payment of incentive to the Jal Sahiyas and administrative expenditure of the VWSC

E. The BRCs must ensure that a Block level plan for IEC and training (training of Masons, Jal Sahiyas and VWSCs) are conducted much ahead of visit to the village. Cost of training and also IEC work to be done for multiple villages will be expensed at the block level.

F. BRCs ensure that only trained masons are involved in construction works and facilitate Jal Sahiyas to promote multiple options of super structure & bathrooms if the beneficiary is ready to contribute

4.3 The Non-Negotiable:

A. VWSC is the key implementing agency; BRC is the key facilitator. The success will depend on the level of cooperation and efficiency of the VWSC and BRC; accordingly BRC will be accountable for the programme

B. Top Quality Sanitary Toilet with water seal/ leach pit and robust super structure; To achieve this only trained masons will do the construction work

C. Community will generate resources to supplement the amount received through revolving fund and arrange the total cost for achieving ODF; IEC funds should be made available to the VWSC. IEC funds must not exceed 10% of the amount received as Revolving fund

SECTION 6: ROLE & RESPONSIBILITY OF VILLAGE WATER AND SANITATION COMMITTEE

The Pani Samiti/Village Water and Sanitation Committee (VWSC) are a standing committee of the GP and are responsible for planning, implementation, operation, maintenance and management of village Drinking Water Security. Key role and responsibility of Village Water & Sanitation Committee is as under;

5.1 Opening and management of a bank account; VWSC shall collect household contributions and user fees for water connection; Preparing annual budgets and recommendations for user fee charges

5.2 Operation & Maintenance of single village scheme and In village distribution supervision for multi village scheme; Water Quality testing; Organizing people to be vigilant about not wasting water and keeping water clean

5.3 Assist Junior Engineer to prepare half yearly action plan of NBA in consultation with Junior Engineer. VWSC shall approve the same and forward it to Assistant engineer.

5.4 Receiving of NBA Funds through VWSC account; Separate cash book to be maintained by VWSC for fund received under NBA.

5.5 DWMS shall advance 50% of the planned outlay to VWSC; VWSC to submit utilization certificate of minimum 60% of the above amount for advance release of the second instalment in time.

5.6 Organising quarterly VWSC meeting on regular basis to monitor and review progress of work; Call urgent meetings as per requirements.

5.7 The VWSC is also responsible for procurement of goods and services, supervising contracts and works and making payments. Further, they are responsible for ensuring professional support for hand pump caretakers and piped water supply operators in the following manner;

A. Ensuring access to spare parts for hand pumps and trained mechanics for regular preventivemaintenance

B. Ensuring the operators handling piped water supply systems are provided with adequate training to gain the technical and financial skills needed to do the job²

² Roles and responsibility based on Gram Panchayet Handbook published by MDWS,GoI,2012 and letter and directives issued by DWSD, GoJ from time to time till 22.10.2011

SECTION 7: JOB DESCRIPTION OF BLOCK/CLUSTER COORDINATOR

7.1 ROLE & RESPONSIBILITY

- A. Helping the village community in formation of VWSCs in all villages
- B. Taking up awareness generation and development communication activities among GP and VWSC members and the village community
- C. Conducting training courses at block and village level for members of VWSCs and GPs and other grassroots level workers in the village (ASHA worker, Anganwadi worker, school teachers, self-help groups, Mahila and Yuvakmandals etc.) on various aspects of water and sanitation. This can be through classroom training, hands on support in villages and exposure visits.
- D. Preparing an Annual Activities Calendar mainly focusing on IEC and training activities and will be responsible for its implementation.
- E. Helping the GPs/ VWSCs in baseline surveys, sanitary survey of drinking water sources and systems falling within their jurisdiction;
- F. Helping the village community/ VWSCs/ GPs in preparation of their Village Action Plan and its approval by the Gram Sabha;
- G. Guiding VWSCs in implementing and monitoring the works relating to water supply schemes and sanitation as envisaged in the Village Action Plan;
- H. Coordination and follow up with grassroots level workers trained in water quality monitoring and surveillance and ensuring that they take up water quality testing and surveillance activities.
- I. Interacting regularly with Panchayats, ASHA workers, anganwadi workers, Self-help groups, Mahila and Yuvakmandals to ensure that issues relating to Water supply, quality and sanitation get regular attention.
- J. Visiting schools to deliver talks to sensitize teachers and students to adopt improved hygiene practices, improved sanitation and safe handling of water to keep it potable.
- K. Helping in conducting social audits.
- L. Coordinating with water quality testing laboratories for water quality testing, reporting to villages, cautioning the GPs/ VWSCs/ PHEDs to take effective steps for maintaining potability and guiding on remedial steps.
- M. Assisting in gathering information for updating habitation status on the IMIS.

7.2 ACTIVITY OF BLOCK COORDINATOR

Block coordinators are responsible for Carrying out all functions of the BRC listed above. To accomplish them they are expected to take up following activities in Regular Basis

1. Monthly Reporting to District Coordinator (NBA) within 5th Day of every month.
2. Doing fieldwork in the Gram Panchayats assigned.
3. Handling matters relating to community mobilization in drinking water and sanitation.
4. Helping the Gram Sabhas in selecting/electing VWSCs in all villages in the block, opening of the Bank account, etc. coordinating with PHED officers in-charge Of rural water supply and sanitation
5. Training VWSC/GP members about planning, implementation, operation and maintenance of water supply systems, keeping water quality surveillance, maintaining sanitation facilities, etc.
6. Assisting GPs/ VWSCs to operate and maintain their water supply systems.
7. Getting water samples tested in the water quality testing laboratory and reporting the results to village community/ GPs, VWSCs.
8. Distribution of chlorine tablets if so decided by the Public Health authorities
9. Coordinating and exchange of information to and from the block level engineer, the block-level health officer for taking corrective action in cases of incidence of water and sanitation related diseases
10. Documenting case studies and success stories from villages
11. Handling day-to-day accounting of BRC expenditure
12. Ensuring monthly meeting of Block Water and sanitation Committee.

SECTION 8: STANDARD OPERATING PROCEDURE FOR BRC OFFICIALS

Government of Jharkhand has established Block Resource Centre to facilitate implementation of Drinking Water and Sanitation Schemes in the State. A Block resource centre is expected to manage Information, Education and Communication and Training & Capacity Building activities (in around 120 Villages in case of Jharkhand) related to water, sanitation and hygiene in the concerned Community Development Block.

- A. The block resource centers are managed by a Non-Government Organization at District Level. Depending on the population of a block, the NGO Have engaged 1 Block Coordinator and 2 to 4 Cluster Coordinators in each block to ensure participatory processes in Village and other tiers of Panchayeti Raj System.
- B. To start with, BRCs have been envisaged as vehicle for **Nirmal Bharat Abhiyan (NBA)**. Direction have been issued by the department for involving Block and Cluster Coordinators to take up IEC and HRD activities in a systematic manner to ultimately achieve **Nirmal Gram Panchayet**.

To achieve the stated objective a Standard Operating Procedure (SoP) for BRCs is proposed. This is aimed to bring in uniformity in approach, standardize reporting mechanism and bringing in greater transparency in Monitoring and evaluation of BRC performance by Drinking Water and Sanitation Mission.

Standard Operating Procedure:

1. Coordinators shall be trained in Basic Techno Managerial aspects of WASH activities to be conducted by them in the village. The training shall be organized by the NGO managing the BRC at the District Level in batches of 25-30 following modules prepared/approved by State Water and Sanitation Mission.
2. After Completion of initial training Session the trainees will be sent in their respective location of Posting for Two weeks. It would be mandatory for them to spend the time in their location identifying the issues of WASH in their respective area. During this period they shall take up the following activities;
 - A. They shall meet PRI leaders, Jal Sahiyas, Junior Engineers and Rural Sanitary Mart representatives and collect their contacts for future reference in the first and second week
 - B. They shall collate report of Sanitary Survey and data on ODF and NGP status vis-a vis AIP for their area from above officials. Based on this they will prepare a Local Area Sanitation Profile as per the format given in the diary.
3. A two day review cum Orientation meeting shall be organized by NGO managing BRC at District Level. In the first day block wise consolidated baseline status and Annual Implementation plan

shall be presented. In the Second day action plan and Result Frame work Document (RFD) for each cluster and block shall be prepared and approved by a panel comprising of Zila Parishad Adhyaksha, Deputy Commissioner and Executive Engineer.

- a. While at individual level RFD shall help to track and monitor individual performance, it acts as a performance recorder of the NGO as well. This would be available in public domain i.e. in PRI offices for public observance. Both input and output parameters shall be mentioned in a clear and transparent manner in RFD.
- b. RFD shall contain planned number, type and minimum standard of IEC and HRD activities to be taken up by BRC in the first year with quarterly break up of inputs and deliverables, physical and financial.

4. After the orientation all Coordinators shall join back their Duty at Respective location. They shall conduct a two days residential cluster level Orientation workshop for Jal Sahiayas. Each such workshop shall be conducted in a Panchayet Level location and attained by around 25 -40 Jal Sahiayas .Following tasks shall be carried out in the workshop;
 - a. The workshops shall be convened by block coordinator. He discusses about the block NBA status and Roles and Responsibility of Jal Sahiya, Mukhia and Block Coordinator for NBA implementation.
 - b. Cluster coordinator presents profile and target under NBA and comes up with a time based action plan to achieve ODF and NGP in target Villages with Jal Sahiya.
 - c. By the end of this exercise Cluster Coordinators create VWSC base line information and submit it to Block for website upload. All Jal Sahiayas are presented with Jal Sahiya Diary.
5. For the next Two months each cluster coordinators ensure conduction of at least one initial meeting with all VWSCs in their respective jurisdiction and two meetings in the village and Panchayet targeted for NGP. They shall visit two villages a day.
 - a. The meetings shall be attended by Mukhia and Jal sahiya along with other VWSC members and representative of Health, Welfare, and School committees. In each meeting Jal Sahiya shall share report of Sanitation survey.
 - b. The first meeting shall sensitize participants about the Water, Sanitation and Hygiene issues and discuss sanitation survey format in front of participants. This meeting would also explain annual work plan for the VWSC and Panchayet. Comparative Sanitation Status of the villages within the Panchayet will be presented
 - c. The second meeting shall come out with a Village Resource Map will be prepared in the second meeting identifying covered/slip back/ and new demand of Individual toilets. VWSC shall take a resolution to make village open defecation free within a certain time limit in presence of Mukhia of the Panchayat.

6. It is expected that targeted villages shall take One month of time to declare them Open Defecation Free. This shall be followed by a period of two months when households are encouraged to use and maintain these toilets. This is the time when Communication and motivational support would be required on regular basis. Following activities shall be organized by Coordinators to ensure achievement and maintenance of ODF status.
 - a. Cluster coordinator visits schools and talk about sanitation. They organize a sanitation rally in the Panchayet.
 - b. Jal Sahiya undertakes inter personal Communication in the village and conduct monthly meeting to review status of ODF movement.
 - c. Block Coordinator to organize a Masons training at block level. He also prepares data base of activities being taken up in given format and ensure timely entry.
 - d. Block coordinator organize ODF celebration in the villages and along with cluster coordinator participate in a meeting to ensure that VWSC takes a resolution for banning Open Defecation for next two months.
 - e. Cluster coordinator consolidates Panchayet wise demand of Toilet and submit it two Block Coordinator and Gram Sabha for information and MGNREGS share.
7. A cluster level Sanitation Fare shall be organized when at least 75% of targeted villages have achieved ODF through community mobilization. This event shall be of 1 day. The fare shall consist of a Painting Competition, a drama on importance of Sanitation, an award for best performing Jal Sahiya and VWSC, and public display of toilet options available with budget. This shall also exhibit proposed location of Community Toilets in the cluster and Solid Liquid Waste Management projects planned in the cluster.
8. Following this a Coordinators shall facilitate conduction of one Gram Sabha on Sanitation issue in each Panchayat with participation of Jal Sahiya and at least 2 other nominated representatives from all VWSCs except Mukhia. Cluster coordinator shall openly read out proposed toilet construction plan with physical and financial details.
9. Gramsabha in presence of VWSC representatives shall finalize MGNREGS budget for sanitation, taking into consideration Support available from NBA, Committed Community Contribution and/or revolving fund support proposed by VWSC.
10. Block coordinator shall ensure filling up of requisite formats by participants and submission of the information to District water and Sanitation Mission. Cluster Coordinator to track the process of collection of funds from the community. A VWSC meeting shall be convened to apply for Revolving funds from the DWSC (in a prescribed format)
11. Block Coordinator shall follow up with Member Secretary of DWSC to release funds to the VWSC Keeping Superintending Engineer informed about the status of release and utilization of Funds. Soon after receiving the Revolving fund from NBA, the Cluster Coordinator shall facilitate the Mukhiya/ Rozgar Sevak to intimate the BPO (Block Programme Officer) for

generating the Master Roll and other associated formalities to make payment for labour through MNREGA funds.

12. Block Coordinator prepares a monthly report on status of construction. They ensure that trained masons, building materials, including pans and traps are available with the VWSC, and periodically review quality and progress of construction and labour payment status through MNREGA funds. Cluster Coordinators, at this stage conduct bi weekly meeting of Jal Sahiyas for status review and enter them systematically in Diary. They prepare Panchayet level consolidation Sheet for same.
13. It is expected that the Cycle of Activities shall be completed in a period of 3 months from the day of ODF celebration. After construction of Individual Household Toilets, Cluster coordinator facilitates VWSC to pass a strict resolution on Banning Open Defecation. A Panchayet level declaration shall be made to monitor Open Defecation Status for next three months.
14. Cluster Coordinator prepares a Village wise report on current availability of Institutional Toilet, Community Toilets, Water Facilities and Solid Liquid Waste Management and estimated necessity for Nirmal Gram Panchayet. They conduct Panchayet wise meetings to draw an action plan to construct these facilities in Targeted Panchayets in the next three month.
15. For the next 3 months of coordinators Monitor use of the toilets and prepare a case for every villages to claim the NBA incentive; Block Coordinator to track usage and ensure loans are paid back within 30 days if the subsidy amount for the village is more than the amount received through Revolving funds .If the subsidy amount is less than the amount received through Revolving Funds the gap will be covered once again covered through community contribution with a time frame of 12 months.
16. During this period it is expected that DPR for mini piped water supply scheme in the same village or provision of Water as per NGP norms and provision for SLWM are attained; Coordinators to ensure that the community contributions for house connections are generated within 1 month of preparation of DPR.
17. Apart from this Block and Cluster coordinators shall organize need based training on various aspects of Water, Sanitation and Hygiene from time to time as may be communicated to them in written by DWSD through Executive Engineer or DWSM NBA coordinator.
18. By the end of the year NGO responsible for managing the BRC shall conduct a Social audit at every Panchayats. BRC shall hold an annual Workshop involving all at District level and two half yearly workshops at Block Level to apprise stakeholders on progress of work and conduct joint review. The annual workshop shall institute award for best practitioner and up keeper of Water, Sanitation and Hygiene at Block level and District Level. By the end of the year BRC organize to upload annual achievement details in specific format to the DWSD Website.

The BRC will continue to engage with the VWSC for the following 2 years to ensure proper usage and develop healthy practices. Annual Guidelines regarding this shall be shared in the beginning of every year.

Block and Cluster coordinators shall use the following format for planning and estimation of their monthly engagement in light of the process mentioned above.

SECTION 9: STAKEHOLDER INFORMATION

8.1 DISTRICT OFFICIALS

SECTION 11: ROLE OF BRC IN ENSURING RURAL DRINKING WATER SAFETY & SECURITY

BRCs have the responsibilities to facilitate the implementation of different phases of Village Water Security Plan as identified in the NRDWP guideline. These are:-

- 1. Preparatory Phase**
- 2. Planning Phase**
- 3. Implementation Phase**
- 4. Operation and Maintenance Phase**
- 5. Monitoring, Audit and Reporting Phase**

1. Preparatory Phase – Preparatory phase activities must focus on awareness and demand generation from the community. There must be zeal by community members that they are going to initiate a movement that will lead to Drinking Water Security of their village. In this regard BRC will undertake social mobilisation activities to create awareness over Drinking Water Security. Some compulsory initial phase meetings must be organised. Like:-

- a) **Convening ward meetings**
- b) **Women group and women led SHGs meetings**
- c) **Similar other meeting ensuring the participation of Community members from different sections of rural community and target groups.**
 - The overall objective of these community mobilization activities will be to guarantee the wide range participation of community members in the Gram Sabha meeting specially convened on Drinking Water Security.
 - Community mobilisation activities must be supported by Participatory Rural Appraisal (PRA) tools such as village resource mapping, transect walk, Chhapati diagram and other tools. BRC will facilitate the experts of the PRI techniques so that they can implement these tools in the village and communities concerned.
 - BRC will maintain the entire relevant database coming from these social mobilisation activities and convey to DWSC.
 - If formation of Village water and Sanitation Committee (VWSC) is not done in any village than BRC will lead the initiative in the formation of VWSC.

Community mobilisation phase will end into the calling of Gram Sabha meeting. BRC will ensure the out coming of Gram Sabha meeting on the following points. These databases will also be recorded by BRC as it will help in the formulation of planning process on Drinking Water Security.

a. Gram Sabha meeting

Some of the important points of concern that must be discussed by the community and must be facilitated by BRCs in the Gram Sabha meeting are-

- How much drinking water is needed by the village?
- What kind of water supply scheme does the community need?
- How much can each household contribute to building the scheme?

- How much should household pay in user fee charges?
- What subsidies can be given to SCs, STs and BPL households?

At the Gram Sabha meeting the BRC must coordinate the discussion in such a way that an overall Scenario on Water supply situation in the village, the actual need of the villagers, an understanding of the assistance available under the NRDWP should become clear. The Gram Sabha meeting must finish with a consensus on developing a village water security plan and BRC must ensure such outcome from Gram Sabha meeting as the basic initial start up of the water security programme.

b. Formation of VWSC

The VWSC acts as a standing committee of the Gram panchayat. The executive member cum treasurer of VWSC –JALSAHIYA- is the key resource person for the implementation of water and sanitation programmes in the village. Besides the Mukhiya of GP being the chairman of VWSC adds coordinating link between the village level decisions with Block and State level authorities. BRC must consider these setups so that to establish harmony between the programme objectives with institutional machinery and village level functionaries. Now here BRC can evaluate their position being a vital key stone of the Drinking Water and Sanitation Mission. In the process of Formation of VWSC, BRC must follow the **Departmental Office Order no. 185 Dated 24-08-11** regarding the formation procedure of VWSC and its basic roles and responsibilities (**enclosed herewith**)

c. The Training of VWSC by BRC

BRC would give the training on different components of NRDWP as well as NBA programme. The training must be arranged depending on the phases of work progress like -

- Training for the preparatory activities of the programme. Such training includes awareness generation by community mobilization tools. In this the various methods of Participatory Rural Appraisal (PRA) would be included to serve the objective.
- Training for planning and implementation of water and Sanitation programmes.
- Training of the maintenance of facilities built by the programmes implemented.

The above training can be given by following methods.

- Classroom sessions by experts.
- Hands on training in the field (Ideally in the GP/VWSCs own village).
- Exposure visits to villages that have done well in water security management.

d. Objectives of the Training

The BRC must make sure that the following objectives get fulfilled by the training provided to VWSC. Accordingly the BRC must prepare a training module (or as provided by SWSM) so as to cover the following objectives-

- Training programmes /workshops for community mobilization.
- Training/ workshop on participatory planning approaches.
- Training on the Departmental/ institutional setups so that the VWSC must know how to gather information on source and systems.

- Training on the preparation of water budget i.e. how much water is available in a particular village and how much is actually needed.
- Training/workshop on ground water harvesting and the concerned recharge options.
- Training to make water safety plan and water quality testing.
- Training on operation and maintenance of accounts and financial procedures.
- Training on preparation of investment plans i.e. what facilities is to be build, how much it will cost and the timing of execution to build the facilities.
- Training to check and report on the performance of water supply and sanitation facilities.

e. Essential activities to be performed by BRCs on community awareness

BRCS must ensure the community awareness activities alongwith the simultaneous execution of Gram Sabha meetings, formation of VWSCs and training/workshop programmes. This will ensure parallel execution of community participation and the planning and implementation of the programmes.

The essential activities in this regard includes -

- Folk drama and street plays on drinking water security and NBA.
- Wall paintings and posters.
- Students and youth rallies in the village on the issues of drinking water security and sanitation facilities.
- Organising special lectures or video shows on selected topics.
- Enlisting services of elected representatives, school teachers, ASHA workers postman, religious leaders and ex-service men.

2. Planning phase

Prior to commencement of planning phase the BRCs must well equipped with the relevant information on existing situation of water facilities and users need as discussed earlier in the preparatory phase. Now the important step to start the planning phase is calling a meeting of Gram Sabha to discuss how the community should go forward by preparing its village water security plan. BRC must arrange and facilitate the convening of the meeting, gathering of stakeholders, PRI and VWSC members.

It must be ensured by the BRC that planning phase is a typically community oriented phase in which the decision would come out through Gram Sabha meeting with the opinion of community itself. So in order to get best output, BRC facilitate the Gram Sabha meeting in a pre-planned way. For this the Agenda of the meeting must be prepared in advance and circulated to different stakeholders, as the meeting progresses on the given agenda BRC would document the proceeding and decision taken. All of these activities must progress by involving VWSC members in such a way that it would appear as it is VWSC and not the BRC that is running the process. **Dedicating the credits of execution of village development programmes to VWSC is actually the mission for which BRCs are formed. The direct result of such approach would ensure the strengthening of VWSC as such approach would let the VWSC to get well aware with every aspect of the Gram Sabha meeting**

procedures together with the out comings of the meeting and the concerned further planning.

Steps of planning phase for Drinking water security and Role of BRC

- 1) **Information gathering** - BRC would conduct a field survey of existing Drinking water sources and water supply infrastructure. Such field survey will include the VWSC and planning team consisting of community members and PRI representative as decided in the Gram Sabha meeting. This will help to get first hand information on the actual condition of existing sources and water supply infrastructure, identify new water sources and to make decisions about the establishment of new infrastructure. The field survey data will be documented by using the questionnaire provided (**enclosed herewith**).
- 2) **Post field survey implementation** – After gathering the information on the sources and water supply infrastructure, the BRC along with VWSC and Planning team must now use the information to prepare their village water security plan. This includes -
 - a) **Water budget**
 - b) **Water source plan**
 - c) **Water safety plan**
 - d) **Operating plan**
 - e) **Service improvement plan**

a) **Water budget:** - The basic need for the preparation of water budget is to know how much water is available from the surface ground and water sources and Rain Water harvesting. To calculate this BRC must follow the formats to document the availability of water from the above sources (**format enclosed**).

If a gap appears between available water and water needed, the BRC will convene a meeting of VWSC and planning team to explore out options to fill this gap. The following options must be explored –

- Implementation of rain water harvesting and groundwater recharge measures.
- Augmentation of existing sources.
- Development of additional sources.
- Usage of surface water.

BRG must provide all help to VWSC and planning team in making decision to opt among these choices.

b) **Water Source Plan :-** BRC would facilitate and advice the VWSC and planning team in identifying sustainability structures for water harvesting and ground water recharge, for establishing such structure BRC must discuss with the planning team about the specific structure best suited to the field conditions and the location in the village where these structure would be established. BRC would help the planning team to opt for one or more structures from the list given below –

- Roof rain water harvesting
- Village ponds
- Check dams
- Percolation tanks

- Sub-surface dykes
- Point source recharge system (bore wells or dug wells)
- Infiltration wells
- Infiltration galleries
- Hydro fracturing
- Diversion Channels and linking of ponds etc.

For developing a village water source plan BRC would take decision on the type of sustainability structures, their capacity and estimated cost. (**The necessary information on this would come in the format provided**).

c) Water Safety Plan

Water safety means protection of Drinking Water Sources from Bacteriological and Chemical contamination. Now the role of BRC in this respect is to have a regular supervision of the surroundings of Drinking water source and if there is any factor that will lead to contamination of water than ensure the control measure to check the contamination. BRC via VWSC is responsible to identify such safety requirements through field survey and help the VWSC to initiate the control measures. The common factors that lead to the contamination of Drinking water resources are mud and water stagnation around the hand pump, open defecation near water sources etc. As water safety is an important activity so BRC will have to create awareness on this through VWSC, Sanitation motivators, Asha worker and group of school children or youths formed by the VWSC.

Some of the common, water safety risks and their control measures are-

d) Operating Plan

Operating plan is prepared for the execution of proper operating functions of Drinking water facilities established so that a long term use of the facilities can be ensured. Now this is a technical part that needs technical engineering interventions to repair the structures built for water source, treatment system, storage tanks, pipes, the pipe line systems built for households etc. This also needs a regular inspection of hardware components like valve inspection and others. Some common preventive measures are also important like people should be taught to use the hand pumps such that the handle does not hit the hand pump. The repairing of hand pump is a regular requirement that needs to be addressed by BRC on priority basis. For this the availability of Hand pump mechanic as per the provisions of DWSD (either through GPs contract a qualified mechanic or give training to villagers on hand pump repairing) must be ensured BRC.

The operation plan for proper functioning of hardware established need engineering expertise. A well-coordinated mechanism is needed from BRC to take help from DWSD engineers, PHED technician or according to the mechanism set out by DWSD.

e) Service Improvement Plan

This is a step for which BRC will have to ensure technical engineering expertise on the proposed works for Drinking water facilities and the improvement of already established source and water supply infrastructures. For each item an engineering proposal have to be submitted about designs and cost estimates, the time of

implementation. All of these must be supported with a logical ground of benefits that will arise from such establishments. (**The basic format for service improvement plan is enclosed herewith**)

3. Implementation phase

The implementation of proposed plan is the important schedule for which BRC must harmonize the village level functionaries with District level authorities together with the ground works that is going to be implemented. BRC must be equipped with the in advance preparation of implementation on the following points-

- a. An annual action plan**
- b. Procurement of materials and contractor needed**
- c. Quality control of the work done**

a. **Annual action plan-** This would be prepared either by BRC or provided by the department as the decision may be. However Annual action plan will enable the BRC on the activities done about the budget and the time schedule with milestones on the proposed target for the year.

b. **Procurement of material and contractors needed-** For this the BRC have to facilitate the procurement procedure as decided by the department and state government. Whatsoever be the mechanism of procurement, the BRC will ensure the proper execution of the procedure on following levels-

- To provide information about the availability of material required to be procured, if they are locally available.
- To facilitate about the quantity of material required to be purchased at a given time depending upon the work progress.
- To facilitate the execution of work at field.

c. **Quality control of work done**

BRCA must ensure the continuous checking of the quality of material and construction works. For this BRC must facilitate the GP/VWSC on the following parameters of quality-

- All material are ISI certified.
- Strength tests for steel and concrete are done.
- Pipes are quality certified from a reputed manufacturer.
- Pressure testing for pipes after installation is done to ensure joints are not leaking and there is adequate pressure at the last tap compared with material used.

During these processes, BRC will guide the GP/VWSC to keep the records of all the activities performed so that a compilation of document can be submitted at the end of the project. For this purpose, the concerned document will be-

- All procurement bills and receipts.
- All quality certificates.
- Records of all payments made with bills of quantities.

- Built plan for all civil works from the contractor.
- Records of any repair/ replacements made during the defects liability period.

4. Operation and Maintenance phase

BRCA have the responsibility to help VWSC on the post establishment operation and maintenance of the infrastructure built for Drinking water facilities. Some common operation include-

- Routine operation and maintenance of pumps.
- Operation and maintenance of water treatment plants.
- Storage and distribution pipeline inspection.
- Implementation of water safety plan and water quality monitoring.

An important activity of operation and maintenance is keeping records of finances i.e. accounting. Since VWSC through Jalsahiya is responsible for the maintenance of accounts, BRC must provide all the help to VWSC for proper accounting. For this, following should be ensured-

- Opening of Bank account of VWSC.
- All income from community collection such as user fee charges, household connection and Government grants must be deposited in the bank account.
- BRC would help the Jalsahiya in maintaining the cash book and recording all transactions.
- Social auditing of the VWSC accounts.
- Facilitate VWSC in preparing annual budget for operation and maintenance.

5. Monitoring phase

BRCA being the connecting link between village and DWSC has the great responsibility to monitor the progress and performance including the milestones set out in the annual action plan. For this BRC must arrange social audit as well as report the activities performed in that year. BRC would help the GP/VWSC in the preparation of social audit, determining the issues for discussion; document the proceeding of the process and decisions taken in the social auditing.

SECTION 12 : ABOUT PROGRAMME FROM NIRMAL BHARAT ABHIYA GUIDLINE

1. BACKGROUND

1.1 Individual Health and hygiene is largely dependent on adequate availability of drinking water and proper sanitation. There is, therefore, a direct relationship between water, sanitation and health. Consumption of unsafe drinking water, improper disposal of human excreta, improper environmental sanitation and lack of personal and food hygiene have been major causes of many diseases in developing countries. India is no exception to this. Government started the Central Rural Sanitation Programme (CRSP) in 1986 primarily with the objective of improving the quality of life of the rural people and also to provide privacy and dignity to women.

1.2 The concept of sanitation was expanded to include personal hygiene, home sanitation, safe water, garbage disposal, excreta disposal and waste water disposal. With this broader concept of sanitation, CRSP adopted a “demand driven” approach with the name “Total Sanitation Campaign” (TSC) with effect from 1999. The revised approach emphasized more on Information, Education and Communication (IEC), Human Resource Development, Capacity Development activities to increase awareness among the rural people and generation of demand for sanitary facilities. This enhanced people’s capacity to choose appropriate options through alternate delivery mechanisms as per their economic condition. The Programme was implemented with focus on community-led and people centered initiatives. Financial incentives were provided to Below Poverty Line (BPL) households for construction and usage of individual household latrines (IHHL) in recognition of their achievements. Assistance was also extended for construction of school toilet units, Anganwadi toilets and Community Sanitary Complexes (CSC) apart from undertaking activities under Solid and Liquid Waste Management (SLWM).

1.3 To give a fillip to the TSC, Government of India also launched the Nirmal Gram Puraskar (NGP) that sought to recognise the achievements and efforts made in ensuring full sanitation coverage. The award gained immense popularity and contributed effectively in bringing about a movement in the community for attaining the Nirmal Status thereby significantly adding to the achievements made for increasing the sanitation coverage in the rural areas of the country. 1.4 Encouraged by the success of NGP, the TSC is being renamed as “Nirmal Bharat Abhiyan” (NBA). The objective is to accelerate the sanitation coverage in the rural areas so as to comprehensively cover the rural community through renewed strategies and saturation approach. Nirmal Bharat Abhiyan (NBA) envisages covering the entire community for saturated outcomes with a view to create Nirmal Gram Panchayats with following priorities:

- Provision of Individual Household Latrine (IHHL) of both Below Poverty Line (BPL) and Identified Above Poverty Line (APL) households within a Gram Panchayat (GP).
- Gram Panchayats where all habitations have access to water to be taken up. Priority may be given to Gram Panchayats having functional piped water supply ,

- Provision of sanitation facilities in Government Schools and Anganwadis in Government buildings within these GPs
- Solid and Liquid Waste Management (SLWM) for proposed and existing Nirmal Grams
- Extensive capacity building of the stake holders like Panchayati Raj Institutions (PRIs), Village Water and Sanitation Committees (VWSCs) and field functionaries for sustainable sanitation.
- Appropriate convergence with MNREGS with unskilled man-days and skilled man-days

2. OBJECTIVES

2.1 The main objectives of the NBA are as under:

- a) Bring about an improvement in the general quality of life in the rural areas.
- b) Accelerate sanitation coverage in rural areas to achieve the vision of Nirmal Bharat by 2022 with all gram Panchayats in the country attaining Nirmal status.
- c) Motivate communities and Panchayati Raj Institutions promoting sustainable sanitation facilities through awareness creation and health education.
- d) To cover the remaining schools not covered under Sarva Shiksha Abhiyan (SSA) and Anganwadi Centres in the rural areas with proper sanitation facilities and undertake proactive promotion of hygiene education and sanitary habits among students.
- e) Encourage cost effective and appropriate technologies for ecologically safe and sustainable sanitation.
- f) Develop community managed environmental sanitation systems focusing on solid & liquid waste management for overall cleanliness in the rural areas.

3. STRATEGY

3.1 The strategy is to transform rural India into 'Nirmal Bharat' by adopting the 'community led' and 'people centered' strategies and community saturation approach. A "demand driven approach" is to be continued with emphasis on awareness creation and demand generation for sanitary facilities in houses, schools and for cleaner environment. Alternate delivery mechanisms would be adopted to meet the community needs. The provision of incentives for individual household latrine units to the poorest of the poor households has been widened to cover the other needy households too so as to attain community outcomes. Availability of water in the Gram Panchayat shall be an important factor for sustaining sanitation facilities created. Rural School Sanitation remains a major component and an entry point for wider acceptance of sanitation by the rural people. Wider technology options are being provided to meet the customer preferences and location- specific needs. Intensive IEC Campaign is the corner stone of the programme involving Panchayati Raj Institutions, Co-operatives, ASHA, Anganwadi workers, Women Groups, Self Help Groups, NGOs etc. A roadmap for engagement of

corporate houses is being introduced. More transparent system involving social audit and active people's participation in the implementation process of NBA is being introduced. Convergence with MNREGS shall also be important to facilitate the rural households with fund availability for creating their own sanitation facilities.

4. IMPLEMENTATION

4.1. The Guidelines of NBA and the provisions hereunder are applicable with effect from 01.04.2012. Implementation of NBA is proposed with 'Gram Panchayat' as the base unit. A project proposal that emanates from a district is scrutinized and consolidated by the State Government and transmitted to the Government of India (Ministry of Drinking Water and Sanitation) as a State Plan. NBA is to be implemented in phases with start-up activities. Funds are to be made available for preliminary IEC work. The physical implementation gets oriented towards satisfying the felt-needs, wherein individual households choose from a menu of options for their household latrines. The built-in flexibility in the menu of options gives the poor and the disadvantaged families opportunity for subsequent upgradation depending upon their requirements and financial position. In the "campaign approach", a synergistic interaction between the Government agencies and other stakeholders is essential. To bring about the desired behavioural changes for relevant sanitary practices, intensive IEC and advocacy, with participation of NGOs/Panchayati Raj Institutions/resource organizations is envisaged.

4.2 NBA will be implemented with a district as the project. The States/UTs are expected to prepare/revise NBA Projects for all the districts, consolidate at State level as State Plan and submit before the Government of India.

5. COMPONENTS OF NBA

The Programme components and activities for NBA implementation are as follows:

(a) Start-Up Activities

5.1 The start-up activities include

- a. Conducting of preliminary survey to assess the status of sanitation and hygiene practices
- b. Base line survey
- c. Orientation of key personnel at the district/GP level
- d. Preparation of State Plan.

The cost of Start-up activities will be met from the IEC funds up to Rs. 10 Lakh. Additional fund requirement, if any, shall be met by the State.

(b) IEC Activities

5.2.1 Information, Education and Communication (IEC) are important components of the Programme. These intend to trigger the demand for sanitary facilities in the rural areas for households, schools, Anganwadis and Community Sanitary Complexes through behavioural change. The activities carried

out under these components should be area specific and should also involve all sections of the rural population. IEC is not a one-time activity. IEC strategy and plan to be drawn to include creation of demand leading to construction and use in a sustained manner. IEC should be conducted at all tiers i.e Districts, Blocks and Gram Panchayat.

5.2.2 A national communication strategy framework has been developed by Government of India giving emphasis on Inter Personal Communication (IPC) at the grassroots level. The states are to evolve their own strategy using folk media, mass media and also outdoor media like wall painting, hoarding etc. The IEC should also focus on health and hygiene practices and environmental sanitation aspects. 5.2.3 Interpersonal communication and door to door to door contact are recognised as the most significant tools for attaining the programme goals. In order to strengthen communication machinery at the village level with participatory social mobilization, guidelines for engagement of village level motivators (Swachchhata Doot / Sanitation Messengers) have been issued separately. As part of this strategy, in addition to Swachchhata Doots, field functionaries like Bharat Nirman Volunteers, ASHA, Anganwadi workers, School Teachers etc can also be engaged at the village level for demand creation and taking up behaviour change communication. The motivator can be given suitable incentive from the funds earmarked for IEC. The incentive will be performance based i.e. in terms of motivating the number of households and schools/ Anganwadis to construct latrines and use them.

5.2.4 Each project district should prepare a detailed IEC plan along with the Annual Action Plan with defined strategies to reach all sections of the community. The aim of such a communication plan is to motivate rural people to adopt hygiene behaviour as a way of life and thereby develop and maintain all facilities created under the programme. The Annual IEC Action Plan should be duly approved by the DWSC/DWSM. The Communication and Capacity Development Units (CCDUs) / Water and Sanitation Support Organisations (WSSOs) set up at the state level must support the districts in developing a good IEC plan and also in implementing it. Observance of Sanitation Day/ Sanitation Week / Sanitation Fortnight should be essential component of the Annual Action Plan.

5.2.5 For effective dissemination of the IEC material, funds may also be provided under this component

to blocks and gram Panchayats for execution of works. They may take up such activities by engaging local NGOs for interpersonal communication; selecting motivators; executing works like wall paintings,

street plays etc. The development of such material executed by the Panchayats may be standardized by

the district or the CCDU.

5.2.6 The IEC funds should be broadly divided into pre Nirmal and Post- Nirmal phase so as to have funds for sustaining the movement. The project districts, however, shall have the flexibility of deciding

this division depending on the baseline survey reports and rate of acceleration of sanitation coverage.

5.2.7 Funds available under IEC may be used for imparting hygiene education to the rural communities, general public, as well as children in schools. The IEC plan should include a component for raising awareness among school going children, teachers and PTAs.

5.2.8 IEC funding will be in the ratio of 80:20 between GOI and the State Governments and the total IEC cost including start up grant will be limited to 15% of the total project cost.

(c) Capacity Building

5.3.1 This component is for training of VWSC and PRI members, block and district functionaries and grass root functionaries like ASHA and other health, education and related functionaries, Anganwadi workers etc. SHGs can be trained in trades such as masonry work, brick-making, toilet pan making and plumbing etc as also for awareness raising activities. NGOs/CBOs of repute can be engaged for this activity. State Resource Centres and Regional / District Resource Centres should be identified for conducting such trainings.

5.3.2 Capacity building funding will be in the ratio of 80:20 between GOI and the State Governments and will be limited to 2% of the IEC budget.

(d) Construction of Individual Household Latrines

5.4.1 A duly completed household sanitary latrine shall comprise of a Toilet Unit including a super structure. The programme is aimed to cover all the rural families. Incentive as provided under the scheme may be extended to all Below Poverty Line (BPL) Households and Above Poverty Line Households (APL) restricted to SCs/STs, small and marginal farmers, landless labourers with homestead, physically handicapped and women headed households. The construction of household toilets should be undertaken by the household itself and on completion and use of the toilet; the cash incentive can be given to the household in recognition of its achievement.

5.4.2 The incentive amount to Below Poverty Line (BPL) household/identified APLs for construction of one unit of IHHL shall be Rs.4600.00 (Rs.5100.00 for difficult and hilly areas). The central share out of this shall be Rs.3200.00 (Rs.3700.00 in case of hilly and difficult areas) and State Government share shall be Rs.1400.00. Minimum beneficiary share shall be Rs.900.00 in cash or labour. State Governments are allowed the flexibility to provide higher incentive for a household toilet, of the same or higher unit costs from their own funds. All houses constructed with the central or/and state assistance should invariably have suitable sanitation facility as an integral part. However, All houses constructed by the beneficiaries under Indira Awas Yojana (IAY) or any other state rural housing scheme which did not have toilets shall also be eligible for the incentive as above for creation of sanitation facilities for the targeted groups under NBA.

5.4.3 APL families not covered by the above incentives will take up construction of the household latrines on their own through motivation. The IEC activities will provide comprehensive coverage to all the families in the GP without exceptions. APL families facing cash crunch may access the revolving fund as outlined in the guidelines.

5.4.4 Construction of bucket latrines is not permitted in the rural areas. The existing bucket latrines, if any, should be converted to sanitary latrines and the sharing pattern for incentive for the targeted beneficiaries shall be identical to that of construction of individual house hold latrines.

5.4.5 Ministry of Rural Development notification Number S.O.1022(E) dated 04.05.2012 regarding convergence of TSC with MNREGS will be mutatis mutandis applicable for convergence with NBA.

(e) Rural Sanitary Marts and Production Centers 5.5.1 The Rural Sanitary Mart is an outlet dealing with the materials, hardware and designs required for the construction of sanitary latrines, soakage and compost pits, vermi-composting, washing platforms, certified domestic water filters and other sanitation & hygiene accessories required. RSMs should ensure that a variety of pans (ceramic, mosaic, HDP, fiberglass) are available for choice by the beneficiaries. RSM should necessarily have those items, which are required as a part of the sanitation package. It is a commercial venture with a social objective. The main aim of having a RSM is to provide materials, services and guidance needed for constructing different types of latrines and other sanitary facilities for a clean environment. Production Centers are the means to produce cost effective affordable sanitary materials at the local level. They could be independent or part of the RSMs.

5.5.2 The Production Centers/Rural Sanitary Marts could be opened and operated by SHGs / women Organizations/Panchayats/NGOs etc. Support of private entrepreneurs may also be taken for ensuring an effective supply chain.

5.5.3 DWSM/DWSC should have a Memorandum of Understanding (MoU) with the RSMs/PCs along with a system of joint monitoring evolved to ensure that the RSMs & PCs are on track with production plans as per requirement. RSMs should have a method of quality certification of its products and a band of trained masons and motivators.

5.5.4 Quality standards (where notified by BIS or by MoDWS) for each of the items of purchase should be strictly adhered to.

5.5.5 An interest free loan up to Rs.3.5 lakh can be given for establishing RSM/PC out of revolving fund available with the district. In case more RSMs are required, a maximum of up to Rs.35 Lakh from the Revolving Fund can be utilized for this purpose. Loans from the revolving fund for RSM/PC shall be recovered in 12-18 installments after one year from the date of receiving the loan.

(f) Provision of Revolving Fund in the District

5.6.1 The revolving fund may be given to Cooperative Societies or Self Help Groups whose creditworthiness is established, for providing cheap finance to their members. Loan from this fund should be recovered in 12-18 installments. NBA projects will have the flexibility to decide the other terms and conditions for sanction of the revolving fund. This revolving fund can be accessed by APL households not covered for incentives under the guidelines. Loan can also be given to the owner of the household where Anganwadi center is located for construction of baby friendly toilet provided the ICDS authorities agree to refund the loan from the rent paid to the house owner. 5% of the District

project outlay subject to a sum of up to Rs.50 Lakh, can be used as revolving fund. The revolving fund is shared between Centre and State on an 80:20 basis.

(g) Community Sanitary Complex

5.7.1 Community Sanitary Complex is an integral component of the NBA. These Complexes, comprising an appropriate number of toilet seats, bathing cubicles, washing platforms, Wash basins etc, can be set up in a place in the village acceptable and accessible to all. Ordinarily such complexes should be constructed only when there is lack of space in the village for construction of household toilets and the community owns up the responsibility of their operation and maintenance. The ultimate aim is to ensure construction of maximum IHHLs and construction of community complexes will be restricted to only when IHHLs cannot be constructed, for whatever reason, and also teach the community of "Hygiene practices". The maintenance of such complexes is very essential for which Gram Panchayat should own the ultimate responsibility. User families may be asked to contribute a reasonable monthly user charge for cleaning & maintenance. The proposal for putting up CSC will be approved by the National Scheme Sanctioning Committee (NSSC). Such complexes can also be made at public places, markets, etc. where large scale congregation of people takes place. Suitable maintenance guidelines may be adopted by the community to ensure proper maintenance of the complex.

5.7.2 Maximum unit cost prescribed for a community sanitary complex is up to Rs.2 lakh. Sharing pattern amongst Central Government, State Government and the community is in the ratio of 60:30:10. The community contribution, however, can be made by the Panchayat out of its own resources, from grants of the Thirteenth Finance Commission or from any other fund of the State duly permitted by it.

(h) Institutional Toilets

5.8.1 Children could be a good channel to influence parents to adopt proper sanitary habits. Children are more receptive to new ideas. Schools/Anganwadis are appropriate institutions for changing the behaviour, mindset and habits of children from open defecation to the use of lavatory through motivation and education.

SCHOOL TOILETS

5.8.2 Toilets in all types of Government Schools should be constructed. Emphasis should be given to toilets for Girls in Schools. Toilet should provide access opportunity to children with special needs. A toilet unit consists of a toilet and minimum of two urinals. Separate toilet units for girls and boys should be provided in all co-educational schools, which are to be treated as two separate units and each unit is entitled to Central assistance. The number of toilet units to be constructed should be adequate to meet the requirements of the school as per the strength of the students attending the school. State/UT Governments, Parent-Teachers Association and Panchayats are free to contribute from their own resources over and above the prescribed amount.

5.8.3 In addition to creation of hardware in the schools, it is essential that hygiene education is imparted to the children on all aspects of hygiene. For this purpose, at least one teacher in each school must be trained in hygiene education who in turn should train the children through interesting activities and community projects that emphasize hygiene behaviour. The expenditure for this purpose can be met from the IEC fund earmarked for the project. The district and Panchayat implementing agencies should ensure good coordination with Department of Education and Health & other partners in order to fulfill the objective of SSHE i.e. to provide a safe, healthy learning environment to all children.

5.8.4 The Central assistance per unit will be restricted to 70 percent for a unit cost of Rs.35,000/- (Rs.38,500 in case of hilly and difficult areas). Funding for School Sanitation in a NBA Project is provided by the Central and State Government in the ratio of 70:30.

ANGANWADI TOILETS

5.8.5 In order to instill the practice of using a toilet in children from very early stage in life, it is essential that Anganwadis are used as a platform of behaviour change for the children as well as the mothers. For this purpose, each Anganwadi should be provided with a baby friendly toilet. Since there are a large number of Anganwadis operating from private premises, following strategy may be adopted;

- (a) In all the Anganwadis, which are in Government buildings, baby friendly toilets should be constructed from the NBA funds provided.
- (b) In those Anganwadis, which are in private buildings, the owner must be asked to construct the toilet as per design, and, he/she may be allowed to charge enhanced rent for the building to recover the cost of construction.
- (c) Alternatively, the toilet may be constructed from revolving fund component under the NBA and, suitable deductions made from the monthly rental paid to the owner to recover the cost over a period of time.

5.8.6 Unit cost of a toilet shall be up to Rs.8,000 (Rs.10,000 in case of hilly and difficult areas) for each Anganwadi in the rural areas. Financial assistance to be given by Government of India will be restricted to Rs.5,600 (Rs.7,000 in case of hilly and difficult areas). Additional expenses can be met by the State Government, Panchayats or funds from Thirteenth Finance Commission, MPLADS, MLALADS, MNREGS etc.

5.8.7 Construction of Anganwadi toilets is to be prioritised in the 200 high focused districts to assist in tackling the issue of malnutrition.

5.8.8 All government buildings constructed with financial support of the Centre must have appropriate sanitation facilities under the respective schemes as an integral component of the scheme. This is considered essential to achieve the vision of 'NIRMAL BHARAT'.

- (i) Solid and Liquid Waste Management

5.9.1 The objective of NBA is to bring about improvement in the general quality of life in rural areas. Solid and Liquid Waste Management (SLWM) is one of the key components to address this. SLWM is to be taken up in project mode for each Gram Panchayat (GP) with financial assistance capped for a GP on number of household basis to enable all GPs to implement sustainable SLWM projects. Under this component, activities like compost pits, vermin composting, common and individual biogas plants, low cost drainage, soakage channels/ pits, reuse of waste water and system for collection, segregation and disposal of household garbage etc can be taken up. Projects should be approved by State Scheme Sanctioning Committee (SSSC). Assistance of professional agencies/NGOs may be sought to develop /test/ implement such projects. Projects will be prioritized in identified GPs targeted for Nirmal status and those that have already been awarded Nirmal Gram Puraskar (NGP). SLWM can also be implemented by dovetailing funds from other Rural Development programmes like MNREGS etc.

5.9.2 The total assistance under NBA for SLWM projects shall be worked out on the basis of total number of households in each GP, subject to a maximum of Rs.7 lakh for a GP having up to 150 households, Rs.12 lakh up to 300 households, Rs.15 lakh up to 500 households and Rs.20 lakh for GPs having more than 500 households. Funding for SLWM project under NBA is provided by the Central and State Government in the ratio of 70:30. Any additional cost requirement is to be met with funds from the State/GP.

(j) Maintenance of facilities created under NBA

5.10 It is essential to train the community, particularly all the members of the family in the proper upkeep and maintenance of the sanitation facilities created. The IEC activities should include awareness of the community on how to maintain the sanitation facilities. The maintenance expenses of individual household sanitary latrines should be met by the households. The maintenance cost of community sanitary complexes may be met by the PRIs through appropriate mechanisms like user charges etc. The concerned departments should provide adequate funds for maintenance of school/Anganwadi toilets. Any other appropriate funds made available by the state government to the PRIs/districts may be utilized.

(k) Administrative Charges

5.11.1 The Administrative Charges include money spent on , salary of temporary staff deployed for the execution of NBA, support services, fuel charges, vehicle hire charges, stationery, monitoring & evaluation of NBA project. However, in no case shall additional posts be created, nor separate vehicle purchased for the implementation of the NBA project. But in order to implement the projects professionally, specialists/ consultants from the fields of Communication, Human Resource Development, School sanitation & Hygiene education and Monitoring may be hired for the project period. The fees of the consultants may be paid from the administrative charges. Purchase of one computer with accessories is permissible per district.

5.11.2 Administrative component to be specified under the project may be up to 4 per cent of the total district project outlay.

5.11.3 The following items of expenses are specifically prohibited under "administrative expenses":

- a. Purchase of vehicles
- b. Purchase of land and buildings
- c. Construction of official buildings and rest houses (this excludes toilet units needed for NBA projects)
- d. Purchase of office equipment
- e. Expenses for any political party and religious organisations
- f. Expenses for gifts and donations
- g. Purchase of cell phones
- h. Transfer of funds to the State level institutions for meeting administrative expenses.

6. NATIONAL SCHEME SANCTIONING COMMITTEE

6.1. National Scheme Sanctioning Committee (NSSC) will be constituted under NBA for specific periods

to approve or revise the project proposals for the districts, as received from the State/UT Governments

duly approved by the State Scheme Sanctioning Committee (SSCC). There will be seven members in the

NSSC. The constitution of the NSSC shall be as follows:

1. Secretary, Ministry of Drinking Water And Sanitation - Chairperson
2. Additional Secretary & Financial Advisor, Ministry of Drinking Water and Sanitation
3. Four non-official experts in the field of rural sanitation nominated by the Ministry
4. Secretary in-charge of rural sanitation of the State whose proposal is to be considered
5. Joint Secretary in-charge of Department of Elementary Education, Ministry of Human Resource Development
6. Joint Secretary in-charge of National Rural Health Mission
7. Joint Secretary in-charge of Women and Child Development
8. Joint Secretary in-charge of Sanitation, Ministry of Drinking Water And Sanitation - Member Secretary

7. IMPLEMENTING AGENCIES

7.1. Implementation of NBA requires large scale social mobilization and monitoring. A 4-Tier implementation mechanism should be set up at the State/District/Block/Village level as given below :

7.2 State Water and Sanitation Mission (SWSM)

7.2.1 As a step towards achieving coordination and convergence among State Departments dealing with Rural Drinking Water Supply, Rural Sanitation, School Education, Health, Women and Child Development, Water Resources, Agriculture etc. a State Water and Sanitation Mission should be set up at the State/UT level. It shall be a registered society under the aegis of the Department/Board/ Corporation/Authority/Agency implementing rural water supply and sanitation programme in the State.

7.2.2 The SWSM shall be headed by the Chief Secretary/Additional Chief Secretary/Development Commissioner with Secretaries in-charge of PHED, Rural Development (RD), Panchayati Raj (PR), Finance, Health, Education, Women and Child Development, Water Resources, Agriculture, Information and Public Relations (I&PR) as members. Principal Secretary / Secretary of the Department looking after Sanitation/Drinking Water in the State shall be the nodal Secretary responsible for all the SWSM activities and for convening the meetings of the Mission. Experts in the field of sanitation, hydrology, IEC, HRD, MIS, media, NGOs etc. may be co-opted as members.

7.2.3 SWSM shall supervise implementation of NBA in the project districts in the State, ensure convergence mechanism between line departments, prepare the Annual Implementation Plan for each district as per the progress made by districts, receive Grant-in-aid from Centre earmarked for specific project districts and disburse to the DWSMs. All projects shall have to be approved by State Scheme Sanctioning Committee (SSSC). The mission shall meet at least once in six months

7.3 Water and Sanitation Support Organization (WSSO)

7.3.1 All States should set up Water and Sanitation Support Organization (WSSO) under State Water and Sanitation Mission (SWSM) to deal with IEC, HRD and Monitoring and Evaluation at the State level. Communication strategy for the State should be planned by the WSSO and should be regularly monitored for effective implementation. In states where Water supply & Sanitation are handled by two different departments, a CCDU (Sanitation) should be associated with the WSSO. Consultants from the fields of Communication, Human Resource Development, and Monitoring and School sanitation & hygiene education may be engaged.

7.4 District Water and Sanitation Mission (DWSM):

7.4.1 A District Water and Sanitation Mission (DWSM) shall be constituted at the district level. The line departments will play the catalytic role in implementation. The composition of DWSM should be as follows:

- DWSM shall be headed by Chairman of Zilla Parishad/ District Collector/Deputy Commissioner. The members would be –all MPs/MLAs and MLCs of the District and Chairperson of the Standing

Committees of the Zilla Parishad or their representatives; District Officers of Education, Health, Panchayati Raj, Social Welfare, ICDS, PHED, Water Resources, Agriculture, Information and Public Relation;

- NGOs shall be identified by the DWSM and co-opted into the Mission as members.
- The Executive Engineer of PHED/District Engineer of the ZP/ any other officer approved by SWSM shall be the Member Secretary.
- The Mission shall meet at least quarterly.

DWSM should plan and implement the district NBA project with appropriate IEC strategies and convergence mechanisms with other line departments. DWSM should also ensure fund flow to the GPs for attaining the objectives of NBA. It should review and monitor programme implementation so that the objectives of the district annual action plans may be achieved leading to sustainable Nirmal Gram Panchayats.

7.5 Block Resource Centres (BRC)

7.5.1 The role of Block Panchayats in rural drinking water and sanitation sector needs to be strengthened to provide guidance, support and monitor water supply and sanitation status in GPs. Block Panchayat is the ideal unit for providing support to a GP or a group of Gram Panchayats. To achieve this objective, Block Resource Centres (BRC) shall be set up as per Guidelines issued by the Ministry of Drinking Water and Sanitation vide letter no. W-11042/72/2009 dated 24th August 2010. BRC shall provide continuous support to the programmes of the Ministry in terms of awareness generation, motivation, mobilisation, training and handholding of village communities, GPs and VWSCs. The BRC will serve as an extended delivery arm of the DWSM in terms of software support and act as a link between DWSM and the GPs/ VWSCs/ village communities.

7.5.2 Capacity building and generating awareness among the village community on various aspects of sanitation will be taken up by BRCs. It will also help the GPs in achieving Nirmal Gram status, sustaining and building on it with effective and low cost management of solid and liquid wastes.

7.6 Village Water and Sanitation Committee

A Village Water and Sanitation Committee shall be constituted as a sub-committee of Gram Panchayat in Gram Panchayats, for providing support in terms of motivation, mobilization, implementation and supervision of the programme. The VWSC should play a crucial role in the comprehensive and saturation approach to Nirmal Grams. .

8. ROLE OF PANCHAYATI RAJ INSTITUTIONS

8.1 As per the Constitution 73rd Amendment Act, 1992, Sanitation is included in the 11th Schedule. Accordingly, Gram Panchayats have a pivotal role in the implementation of NBA. The programme will be implemented by the Panchayati Raj Institutions at all levels. They will carry out the social mobilization for the construction of toilets and also maintain the clean environment by way of safe disposal of wastes. PRIs may engage suitable NGOs for inter-personal IEC and training. Community Complexes constructed under the NBA will be maintained by the Panchayats/Voluntary Organizations/Charitable Trusts. Panchayats can also contribute from their own resources for School Sanitation over and above the prescribed amount. They will act as the custodian of the assets such as the Community Complexes, environmental components, drainage etc. constructed under NBA. GPs can also open and operate the Production Centers/Rural Sanitary Marts.

8.2 GPs can play a key role in promoting regular use, maintenance and up gradation of toilets and inter-personal communication for hygiene education. Panchayats and NGOs who are in the frontline of implementation have a key role in ensuring that safety standards are being met with all components of NBA e.g. the distance between water source and a latrine – adhering to the minimum distance for IHHL, school and Anganwadi toilets and community sanitary complexes; regulating pit-depth, pit lining to prevent pollution, collapse of pit etc. The same will apply to key hygiene behaviour such as keeping the environment around hand pumps / water sources clear and tidy and free of human and animal excreta. GPs must also play a role in the monitoring of the NBA programme. Both Block level and District level PRIs must regularly monitor the implementation along with the concerned officials.

9. ROLE OF NON GOVERNMENTAL ORGANISATIONS

9.1 NGOs have a catalytic role in the implementation of NBA in the rural areas. They have to be actively involved in IEC activities and capacity building leading to demand generation, construction and use of sanitation facilities. NGOs may also be engaged to conduct base line surveys and PRAs specifically to determine key behaviours and perceptions regarding sanitation, hygiene, water use, O&M, etc NGOs can also open and operate Production Centers and Rural Sanitary Marts. Selection of NGOs should be done following a transparent criterion.

10. ROLE OF CORPORATE BODIES

10.1 Corporate houses should be encouraged to participate in the NBA as an essential part of the Corporate Social Responsibility (CSR). The realization that a healthy workforce can contribute towards better services for their output is already in their understanding. The issues of getting popularity for marketing of their products and services or mere status also attract corporate houses towards taking up social causes and increasing interaction with people. Thus, NBA can serve as a platform for the Corporate Houses to help address their CSR.

10.2 The corporate houses may take up the issues of sanitation through IEC, HRD or through direct targeted interventions such as:

- a) Provide suitable rural friendly sanitation facilities in workplace for use and demonstration to

their employees from rural areas

- b) Establish demonstration fields / rural sanitation parks for exposure of various technology options available under NBA to the rural populace.
- c) Organise exhibitions / sanitation melas.
- d) Provide necessary exposure to the children about proper sanitation and hygiene
- e) Provide additional incentive to rural households in form of suitable sanitary materials or create sanitation facilities for the rural populace through appropriate local organisation
- f) Provide sanitary complexes in market or other public places / around work places or alike
- g) Provide assistance in effective solid and liquid waste management technology and resources
- h) Provide trained manpower for maintenance of sanitation facilities and/or SLWM establishments
- i) Undertake tailored research work for suitable local technology options for sanitation services in the rural areas
- j) Propagate the programme through mass media
- k) Adopt habitations/villages/GPs to make them Nirmal Grams

11. PROJECT FUNDING

11.1 NBA Component-Wise earmarking and funding pattern

| S.N. | Component | Amount earmarked as percent of the NBA project outlay | Contribution Share | | |
|------|---|--|---|---------|---------------------------------|
| | | | GOI | State | Beneficiary Household/Community |
| a. | IEC, Start Up Activity and Capacity Building | Up to 15% | 80% | 20% | 0% |
| b. | Revolving Fund | Up to 5% | 80% | 20% | 0% |
| c. | (i) Individual Household Latrines | Actual amount required for full coverage | Rs.3200 (3700 in case of Hilly and difficult areas) | Rs.1400 | Rs.900 |
| | (ii) Community Sanitary Complexes | Actual amount required for full coverage | 60% | 30% | 10% |
| d. | Institutional Toilets including School and Anganwadi Sanitation | Actual amount required for full coverage | 70% | 30% | 0% |
| e. | Administrative charges | Up to 4% | 80% | 20% | 0% |
| f. | Solid/Liquid Waste Management (Capital Cost) | Actual amount as per SLWM project cost within limits permitted | 70% | 30% | 0% |

| | | | | | |
|--|--|--|--|--|--|
| | | | | | |
|--|--|--|--|--|--|

12. ANNUAL IMPLEMENTATION PLAN (AIP)

12.1 The main objective of the Annual Implementation Plan (AIP) is to provide a definite direction to the programme for creation of Nirmal Grams. It is also required to provide basis for monthly and quarterly monitoring of physical and financial progress during the course of the financial year vis-à-vis the planned activities. The AIP should include:

- a) report on the progress made by the State in achieving the objectives of NBA during the previous year against the AIP objectives
- b) reasons and comments for variation, if any;
- c) a plan of activities with physical and financial estimates under each component of the NBA for the proposed financial year.
- d) Monthly Quarterly projected targets
- e) write ups of success stories, best practices, innovations introduced, new technologies used and

12.2 AIP should be prepared by identification of Gram Panchayats to be saturated for attaining the project objectives. These GP plans should be consolidated into Block Implementation Plans and further into District Implementation Plan. The State Water and Sanitation Mission will suitably consolidate the District Implementation Plans as the State Implementation Plan.

12.3 The States/UTs shall prepare the AIP and submit the same before the commencement of the financial year on the basis of the balance works to be completed, to the Plan Approval Committee (PAC) of MoDWS for finalization.

12.4 The proposed AIPs shall be discussed in the PAC and finalized with or without modifications. The finalized AIP shall be prepared by the States based on financial allocation of funds forwarded to the Central Govt. within a fortnight of the discussions in PAC and also uploaded in the website through online monitoring system. The recommendation of PAC for a financial year shall be valid for that financial year only.

12.5 AIP should be prepared following the saturation approach highlighting comprehensive sanitation and water coverage on the basis of identification of Gram Panchayats that can be made Nirmal during the year/in the coming years. The enlistment of Gram Panchayats should be done in a manner such that all the Gram Panchayats in a Block/District are covered progressively so as to make the State “Nirmal”. The AIP budgeting should follow the cost norms of NBA and should be compiled to project the financial demand of Central Share during the year.
