Background

On 19 November 2013, the first official World Toilet Day was observed globally. This is to address the huge concern of about 1.2 billion people across the globe defecating in the open. The UN General Assembly has declared 19 November as the World Toilet Day this year, though this day is being observed unofficially by sector professionals for the last 20 years. The UN Declaration will not only help to draw attraction of governments and policy makers, but will trigger the need for demanding improved sanitation amongst the citizens globally. In India, this will be an occasion to pledge for our commitment to achieve the MDG by 2015.

In line with the global commitment, the Drinking Water and Sanitation Department, Government of Jharkhand observed the World Toilet Day in association with UNICEF on 27 December 2013. This observance was aimed to develop an overall awareness and motivation of the people of the state and was therefore presided by the Honourable Chief Minister of Jharkhand along with the Minister for Drinking Water Supply. The event was planned to ensure effective partnership of the elected representatives of the Panchayats, the District and Block level functionaries involved in service delivery, Civil Society Organisations and NGOs working for the advancement of the water and sanitation programme in the state. The World Toilet Day was envisaged as an opportunity to highlight the gravity of the concern for rural sanitation, to portray innovative approaches adopted by the state to meet the challenges and to bring together all stakeholders to have a common understanding and shared vision of future interventions.

Water and Sanitation are key factor for all human development inputs to follow. Thus, poor outcomes in nutritional status of children (stunting) has been directly attributed to large number of the population in the state defecating in the open. Also, to gain better dividends from the health infrastructure, it is imperative that incidence of gastrointestinal diseases are reduced/ arrested. Every year, about 45,000 children under the age of 5 years die, out of which about 20% is due to diarrhoea. This mortality, for instance, can be checked only through proper arrangement of water and sanitation, as investments in health infrastructure will prove to be ineffective in the absence of access and use of appropriate WASH facilities.

Appreciating this DWSD has placed a lot of emphasis on convergence between programmes and government departments to ensure overall advancement of public health. For Institutional Sanitation, a convergence has been worked out between DWSD and JEPC for ensuing proper WASH facilities in schools. Convergence between NBA, NRDWP and SSA will ensure that schools have proper sanitation (with separate toilets for girls), hand washing facilities, clean environment for MDM (Mid-Day Meal) and proper drinking water facilities. Coupled with this, efforts have been made to strengthen school curriculum with appropriate information and messages on hygiene education. Similarly,

efforts have been made to promote sanitation, hygiene and water supply in Anganwadi centres.

DWSD has developed its own website daa.jharkhand.gov.in wherein all relevant information is being updated regularly. A Call center has been established in the State Headquarter to address tube well repair requirement and other intriguing factors faced by the PRI members, on regular basis. The Call center maintains a roster of all Mukhiya and JalSahiyas in the state and information is being disseminated to them through SMS using Call center facility.

DWSD is in constant pursuit to strengthen the delivery mechanism through provisioning of quality manpower and additional funding opportunities. Currently, Rs 900 crore has been mobilized as World Bank support to improve Water and Sanitation services in 6 districts of the state. It will benefit 11 lakh people living in 3300 villages under 530 Panchyats.

The DWSD has also developed plans to address institutional and community level sanitation facilities promoting community toilets (pay and use) to be owned and maintained by local users. The World Toilet Day provided the opportunity to reiterate these aspirations and involve all stakeholders to forge ahead and achieve the desired outcomes.

Nirmal Bharat Abhiyan in Jharkhand - The Innovation

Sanitation coverage in Jharkhand portrays a dismal picture having only about 8% of the rural population using a sanitary toilet. DWSD is trying to address the issue of eradicating open defecation by making needful technology and process innovations. State has very effectively involved the Panchayats, assigning the elected representatives of Panchayats the leadership role in programme implementation. This has been supplemented by devolution of funds at the village level, wherein the leadership role is being exercised in practice. At the village level, Village Water and Sanitation Committees (VWSC) have been formed which are headed by the Mukhiya of the Gram Panchayat. A village woman is selected as JalSahiya (foot soldier for water and sanitation programme) who acts as the Treasurer of the VWSC.

DWSD has already transferred Rs 30.46 crore to the VWSCs and Gram Panchyats across all 24 districts to carry out Operation and Maintenance of Drinking Water and Sanitation infrastructure. For proper utilization of fund a total of 10,562 accountants are working with the VWSCs and Gram Panchyats and training them on aspects of book keeping. Realizing that VWSCs will be playing a pivotal role in establishing sound public health systems in the villages, they are being continuously trained on different aspects of programme delivery.

The State Programme Management Unit has been in regular touch with 26,047 VWSCs which has been formed in the state till date. The VWSC and the JalSahiya is being viewed as a standing service provider for WASH facilities. To meet this perspective, Tool kits for hand pump repairing have been distributed amongst 4562 Gram Panchyats in Jharkhand.

A total of 30,781 individual household toilets have been constructed in Jharkhand under Nirmal Bharat Abhiyan during the current financial year, i.e., 2013-14. At various primary and middle schools in Jharkhand, a total of 199 toilets have been constructed. In continuation to this effort, the DWSD has adopted an implementation strategy revolving around the “saturation approach”. The VWSCs formed at the Revenue village level are encouraged to address the total population of the village as one unit and work towards eradicating “open defecation” by ensuring that all households have a proper sanitary toilet.

In this context, the DWSD have *innovated a strategy*, wherein, the VWSC having community consensus on achieving ODF status will be accessing a loan from the District Water and Sanitation Mission (DWSM). The DWSM makes this loan available through the provisions of the Revolving Funds, available in the Nirmal Bharat Abhiyan (Rs. 50 lakhs per district). After successful demonstration of a few cases in Ranchi district, in partnership with UNICEF, the DWSD has developed a documentary film on the implementation process. This film is being shown to PRI members across the state to disseminate the strategy.

The NBA implementation strategy was a shift from targeting families to targeting communities; essentially proclaiming that we are no longer counting toilets but taking stock of ODF villages. Further, the loan through Revolving funds was being disbursed to the VWSC taking the community as a unit. This not only addressed the issue of 'saturation approach' but also covered under the campaign the 'slip back' households. Being a part of a community level consensus, the slip back households also expressed desire to opt for new toilets constructed as a result of their own commitment to achieve ODF Status for their village.

Jharkhand has also successfully piloted construction toilets under NBA-MGNREGS convergence. Funds have been released to various Gram Panchyats for toilet construction under MNREGA convergence in Deoghar, Koderma, Godda, Latehar, Lohardagga and Ranchi. Synchronizing the funds available through NBA and MNREGA at the village level has been a challenging task. The DWSD has been engaging with the Rural Development Department continuously to further streamline the convergence between MNREGA and NBA. A proposal to construct 1.5 lakh toilets under MNREGA has been approved. By 2014 DWSD envisage to construct 2 lakh to 2.5 lakh toilets in the state.

Another highlight of implementation of the Nirmal Bharat Abhiyan has been manifested through a unique partnership worked out between the NBA, NRDWP and JSLPS (Jharkhand State Livelihood promotion Society). The engagement of the Self Help Group (SHG) women to strengthen **Village Water and Sanitation Committee (VWSC)** adds to the much needed social capital to the Nirmal Bharat Abhiyan, assuring the community that toilets will be built for the community and by the community to improve the quality of life of the community.

The Nirmal Bharat Abhiyan has also filled in critical gaps in the sanitation programme by provisioning Human Resources for the institutional mechanism responsible for programme delivery. To this end the DWSD has engaged 70 district level coordinators (looking into various thematic aspects of sanitation, 259 block coordinators 421 cluster coordinators through appropriate contract mechanisms. In order to ensure effective performance of the workforce thus engaged, the DWSD is in the process of developing a robust HR Policy and also address issues of remuneration of the contract employees.

In this backdrop the event of World Toilet Day was observed on 27 November 2017.

The World Toilet Day – Participation and Special Features

Presided by the Chief Minister of Jharkhand, the World Toilet Day was observed in Jharkhand with participation of President of Zilla Parishads and Panchayat Samities. Also, Mukhiyas of selected Gram Panchayats participated in the workshop. Civil Society Organisations and NGOs from different parts of the state along with departmental officers were also present. The event was inaugurated by the Chief

Minister along with Minister for Drinking Water and Sanitation and the Additional Chief Secretary for Drinking Water and Sanitation. The Chief Engineer along with the Special Secretary in charge of the World Bank Cell was also present in the workshop. The Mission Director of JEPC (SSA) and Director of Health also graced the occasion and collectively pledged to work for the advancement of water and sanitation in the state.

During the event, appointment letters were distributed to the 21 newly

appointed Assistant Engineers in the Drinking Water and Sanitation Department. This occasion has been viewed as an opportunity to encourage the existing and newly recruited workforce in the DWSD. Shortage of Junior Engineers has long been felt as a critical gap in the drinking water sector in the state. The recruitments were a significant step to meet that gap. Chief Minister of Jharkhand presented an order copy of the drinking water and sanitation facility that has been sanctioned for construction in the premises of Ace archer Deepika Kumari's residence to her parents. Deepika has been an Ambassador for sanitation in the state of Jharkhand and has been working for the promotion of sanitation and hygiene with particular reference to handwashing amongst young children in schools. DWSD has been very proactively seeking partnerships with celebrities in the area of sports to promote sanitation in rural areas. It has been experienced that a local youth after gaining celebrity status has a strong influence on the community to percolate important messages on social change.

One of the significant participation in the World Toilet Day was the Girl's Football Team of Jharkhand, who has recently come back from Spain with flying colours competing in a world tournament. The Girl's team ended up with a Bronze medal.

This team hailing from Ormanjhi of Ranchi district was led by their prolific coach Mr. Franz Gastler. About 30 girl football players, all adolescents, hailing from Ormanjhi agreed to be Ambassadors of the Sanitation Campaign in Jharkhand and agreed to achieve ODF status in their respective Gram Panchayats. The young girls took a pledge to become champions of sanitation and cleanliness in their communities and work together with Panchayats and community

members. The villages where the girl's team would be conducting the awareness generation campaigns were worked out during the event.

A team of Girls from the KGBV (Kasturba Gandhi Balika Vidyalaya) in Bundu presented a play in front of the 300 strong audience, elucidating the significance of sanitation and hygiene and further established a strong sense of urgency amongst the young people present in the event. During the workshop an exhibition was also organised, wherein different NGOs such as PRADAN, Vikas Bharti, ACE and others were invited to showcase their success stories in the field. The exhibition drew huge audiences coming from different parts of the state, who were told about specific technical details of toilet construction, upkeep and regular use.

During the event 9 documents published by the Drinking Water and Sanitation Department (DWSD) were released, which included the State's Sanitation Policy and a very significant compendium of all Government Orders and letters issued with respect to implementation of Nirmal Bharat

Abhiyan in the state. Also, the film on the documenting the implementation processes of NBA implementation in Jharkhand was shown to the audience.

Excerpts from Session 1

Shri Hemant Soren, Honorable Chief Minister of the Government of Jharkhand said that in the 21st century when we are ride luxury vehicles, go to high-end hotels, eat exquisite food, and wear expensive clothes, it is unfortunate that still a large number of people are not using toilets. Globally only 66% people use toilets in India only about 35% people use toilets. Further, only 7-8 per cent population of the state has access to clean toilet among around 60 lakh households. *"I would like to draw the attention of participants' to these figures and urge you to take a vow today to make the state Open Defecation Free"*. These would be possible, he said, through capacity building of PRI institutions. Behavior Change Communication assumes importance in this respect. Being close to the ground PRI is in a better position to spearhead behavior change campaigns. Our Government is committed letter and spirit to support rural sanitation initiatives. Following the deliberations, he urged the house to devise strategy to achieve piped drinking water connection and individual sanitary toilet for every household in Jharkhand by 2017.

Given the context we shall take steps to ensure aspiring PRI electoral candidates shall have toilets in their houses as a pre-qualification of contesting election. The candidates will have to obtain a certificate from Gram Sabhas certifying that they have a toilet in their house for contesting election . Also, the Government would consider making toilet pans VAT free for bringing down the input cost of Individual Household latrine construction cost.

Shri Jay Prakash Bhai Patel, Minister in charge of Drinking Water and Sanitation said that the World Toilet Day is being celebrated when state is observing a Fortnight on account of Foundation Day of the State (15th November). This is being observed with a commitment from ^sthe Government to develop the marginalized communities living at the far flanks of the state. A holistic development without access to clean water and household Sanitation facility do not make sense. Supported by the present Government DWSD has launched several ambitious projects in a short span of time. In the hometown of Bhagwan Birsa Munda Ulihatu (Khunti district) DWSD have started a rural drinking water project. In topographically difficult terrains of

Santhal Parganas several projects have been started. For this hard working official of DWSD needs be acknowledged.

The momentum needs be continued and enhanced. Government is apprised about the practical hurdles in achieving the WASH targets in the State. The Minister said that “We are conscious about the lack of Human Resource and also the problems of adequate payment to the contracted consultants hired as Block Resource Centers (BRCs). Appointment of new Assistant Engineers assumes importance in this respect. We are also in touch with the Government of India for arranging appropriate payments for the BRCs”. The Minister continued to say that “We have also cleared proposal to create additional positions for recruitment under permanent cadre. We also look forward to valid and innovative programmatic proposals. While saying this it's also important that we spend the allotted money judiciously and deliver quality work”.

Finally the Minister reiterated that achieving universal WASH coverage is a challenging task and it is imperative that all relevant stakeholders work together with full commitment to achieve these goals. Appreciating the contributions of UNICEF he concluded that the Government has a firm resolve to perform well in the implementation of both NBA and NRDWP.

Shri Sudhir Prasad, Additional Chief Secretary, Drinking Water and Sanitation Department, compared measures

of WASH indicators with the measures of Health and Nutrition indicators emphasized that “poor health and Nutrition status of children and adults are only the manifestations – the real problem is lack of sanitation and safe water”. Indicators like Child Mortality and Maternal Mortality have a direct connection with lack of toilets and clean drinking water facility. Poor nutritional status has been proved to be having strong relationship with Open Defecation. The DWSD is working to address these challenges caused by lack of

appropriate water and sanitation facilities in rural areas. The aim is to make villages open defecation free by involving entire community and not only few households. Active participation of the villagers is being ensured by generating monetary contributions and

supplementing with revolving funds arrangements. We have recently approved proposal to construct 1.5 lakh toilets in convergence with MGNREGS in the state. By the end of 2014, we look forward to construction of 2 lakh to 2.5 lakh toilets in the state. This will be achieved through a “saturation approach” wherein several villages will be rendered “Open Defecation Free”.

Convergence of Water and Sanitation programs itself assumes a greater role in this context of providing consummate public health security. No Sanitation program can be sustained without Water. He declared that “In eight villages of Ormanjhi, toilets along with small drinking water projects would be started soon”. While DWSD has expertise to extend construction support, regular use and upkeep of private and public assets should be the responsibility of the community. “This”, he said, “is possible only when PRI takes a lead in program implementation. A sum of Rs 30.466 crore has already been transferred to Panchayati Raj institutions accounts for this purpose”.

Shri. Job Zachariah, Chief of UNICEF in Jharkhand further emphasized on the need for increased access and use of toilets in order to achieve improved health and nutritional outcomes. He pointed out that high prevalence of Open Defecation has a direct negative impact on child nutrition. Stunting in children is commonly observed in India, and this is a direct outcome of the large number of people defecating in the open. The malnourished child eventually grows up with reduced immunity and reduced cognitive skills, thus making the person vulnerable to health problems and subsequently ill equipped to ensure livelihood security. He further pointed out that, nearly 9,000 children under the age of 5 years die every year due to diarrhea which is completely avoidable. Gastrointestinal and diarrheal episodes causes unnecessary burden on the health system. We should rather focus on preventive measures by ensuring clean environment, better hygiene practices, use of sanitary toilets and safe drinking water.

Ms. Mamta, Mission Director, JEPC, pointed out that it is imperative that we have proper WASH facilities in schools, particularly separate toilets for girls. Moreover, we need to address appropriate hygiene practices and impart knowledge to the children on appropriate hygiene behaviors. Hygiene in the school and around the Mid-Day Meal requires to be streamlined to ensure proper health protection to the children. Schools are the most appropriate platform for shaping the future generation of our population. In this regard it is imperative that we educate our children on appropriate hygiene practices and behaviors.

The dignitaries including Sri Hemant Soren, Sri Jai Prakash Bhai Patel and Sudhir Prasad visited all six stalls at the venue. Hemant Soren appreciated the innovations and experimentations being carried out in toilet designs and the advanced technical models of mini-pipe-water supply schemes which were on display at the venue. The stalls flanked by colorful flexes presented a range of easy to construct and use model toilets suitable for Rural Jharkhand. These models are offering rural populace a choice based upon their financial status and household requirement and thus have helped in Nirmal Bharat Abhiyan in the State.

Excerpts from Session 2

In the post lunch session, presentations were made by some of the participants/dignitaries on various aspects of sanitation and involvement of PRIs in the implementation of the sanitation programme. This was followed by an open house on discussions on issues related to implementation of NBA.

Presentation on “Strategy for achieving ODF Villages” - Sri Ram Bilas Sinha, Superintending Engineer Ranchi circles: In his presentation Sri Sinha emphasized on observance of following processes to achieve open defecation free villages. Provisions within the NBA Guideline that can facilitate the strategy were discussed in details.

- 💧 100% community consensus is the starting point for proceeding with the strategy; the community should act as a single unit with collective commitment to achieve the goal
- 💧 An estimate to achieve ODF village should be worked out. Subsequently a proposal should be submitted to Member Secretary of the DWSM requesting for loan for executing the work.
- 💧 The loan could be 50% of the total estimate for ODF. The Executive Engineer will make the loan available through the provisions of the Revolving funds
- 💧 Simultaneously a proposal should be submitted to the concerned BDO for accessing MGNREGA funds.
- 💧 On receipt of the loan under the Revolving funds the Village Water and Sanitation Committee (VWSC) will generate matching funds from the community and start the construction work.
- 💧 After the toilets are constructed at all households, the VWSC should hold regular meetings to inspire people to use the toilets and stop defecating in the open.
- 💧 Then the VWSC will declare the village Open Defecation Free (ODF) in a celebration to be held in the village
- 💧 Following achievement of ODF status, the Government has a policy to provide Mini Piped Water Supply scheme to the village

Presentation on “Performance of Panchayats following the Capacity Building workshops held in 2012” - Sri Sudhir Pal, Head, MANTHAN: Representing a leading Civil Society Organization with long standing experience of facilitating participatory initiatives with Panchayats, Sri Paul showed results of a survey conducted by them to assess the role of PRIs in various villages to develop water and sanitation infrastructure in Jharkhand. MANTHAN in partnership with UNICEF and DWSD had conducted intensive capacity building of Panchayats in 14 districts of Jharkhand in the year 2012. During these workshops, the Panchayats were told about their rights and responsibilities with

particular reference to the water and sanitation programmes. Six months following the conclusion of the Capacity Building workshops, MANTHAN conducted a survey to assess the performance of the PRI members in implementation of NBA.

Shri Pal's presentation revealed that the involvement of PRIs at Revenue village and Gram Panchyat level is quite encouraging. But at block and district level the elected representatives of the PRI are neither involved nor committed to the cause of water and sanitation. This is possibly evident since the programme strategy does not involve the Zilla Parishad and Panchayat Samity as much in NBA or NRDWP implementation. It was indicated that PRI members trained on WASH matters were demanding more for WASH funds to address local problems in water supply and even sanitation. It was also noticed that the elected representatives did not get adequate support of the District Water and Sanitation Mission or the field Engineers. An encouraging participation of women PRI members were noticed both during the training programme as also during the survey. It was concluded that the Department's initiative and the intensive capacity building programme has led to substantial awareness amongst the PRI members, but the required support both in terms of prompt fund transfer and technical knowledge remains wanting.

Address by Sri Rahul Purwar, Deputy Commissioner, Deoghar: Deoghar has made an effective beginning in NBA-MGNREGS convergence. Referring the case, DC Deoghar emphasized on commitment at individual level to begin the change. Summary of his speech is given below;

Mindset of people has a big role to play in NBA program. The Panchyati Raj system is the driving engine in the efforts to eradicate the practice of open defecation. He asked the PRI members to start from where they can. "If you think that I will do it only after some requirement is fulfilled then your will not go far ahead" he said. An individual Mukhiya or Gram Pradhan will have to take up the challenge.

Smt. Nilanjana Moitra, PMRDF narrated relevant parts of the revised guideline issued by Government of India on convergence between NBA and MGNREGS. Important features of the guideline are

- It is applicable in respect of BPL and APL families (restricted to SCs/ SF/ MF/ LL with homestead/ PH/ Women headed households).
- The condition of holding of job card and beneficiary to work on his/her IHHL has been relaxed in the case of physically handicapped and women headed households
- Given this the challenge lies in Greater utilization of financial and human resources for better results is the need of the hour.

She further reiterated the need for synchronising both NBA and MNREGA funds at the village level. This has to be initiated at the point of generating demand for “toilets” and “employment”; ideally the process of demand generation should be executed in a single format. Thereafter the flow of the proposals from the Revenue Village to the District (for approval) and downwards is an operational issue. Functionaries of both NBA and MNREGA must ensure proper follow up so that funds from both programmes reach the village at the same time. Most of the glitches experienced currently are due to operational delay and need to be addressed through continuous follow up with officials involved in the district and block levels.

Smt. MayalinaToppo, Zillah Parishad Adhyakhasha of Khunti District, Shri Somnath Basu, WASH officer UNICEF also deliberated upon different aspects of NBA movement in the occasion.

Plenary Session: Sri Sudhir Prasad, Additional Chief Secretary, DWSD said that similar events should be regularly held to ensure interactions between the PRI and Departmental Officers. Also PRI members should get regular supply of all booklets and documents published by the Department.

Many PRI members present in the house indicated that they were not receiving letters and circulars issued by the Department; sometimes quite infrequently they happen to receive some Government letters concerning WASH programmes. In response Sri Sudhir Prasad instructed officials of his department to make sure that letters and circulars from the Department reach every PRI member. However, the PRI members unanimously admitted that DWSD was the only Government Department which has effectively involved and empowered Panchayats to work in the ground.

A PRI member demanded that Jal Sahiyas should be given a fixed honorarium in addition to the incentives currently being given to them. The Additional Chief Secretary assured PRI members that the department will consider their demands.

For focused and regular interaction with PRIs and solve location specific issues DWSD have appointed Circle wise Mentors as state level contact points. The Mentors will be interacting

with District Officials, BRCs, PRI representative and VWSC members in the area of their jurisdiction. Names and contact numbers of all mentors were shared with the participants along with number of centralized Departmental Call center and website for further reference.

S N	Name of Mentor	Designation	Phone No
1	Chaitali Mondol	Assistant State Coordinator(IEC)	9334365022
2	Isha Kumari	State Coordinator(HRD)	8235166613
3	James Toppo	Assistant State Coordinator(S&H)	8987654255
4	Kallol Saha	State Coordinator (HG)	9471710631
5	Maini Barla	State Coordinator (IEC)	9931150443
6	Nitin Kumar	State Coordinator(IT)	9386766964
7	P. C. Chaudhary	Director II	9199537151
8	Ravindra Bohra	State Coordinator(S&H)	9608614325
9	Vivek Singh Chauhan	State Coordinator(WQ)	7677029856

Vote of Thanks

Sri Rajendra Prasad, Deputy Director DWSD, extended the vote of thanks to all participants and appreciated the presentations made by the experts. He welcomed the announcement by the chief minister that no one will be allowed to contest Panchayat elections if he/she does not have a toilet in his/her house.

Hemant expresses concern over J'khand's open defecation problem

SHOCKING FACT About 77% households in state do not have toilets, according to a government pamphlet

HT Correspondent

hjharkhand@hindustantimes.com

RANCHI: About 77% households in Jharkhand do not have toilets, according to a government pamphlet. These figures are a cause for concern, said chief minister Hemant Soren. Soren was addressing a one-day workshop organised by the state drinking water and sanitation department (DWSD) here on Wednesday. The subject was curbing open defecation in Jharkhand.

The event was part of the statehood day fortnight. At the function, Soren gave away appointment letters to 21 assistant engineers and launched nine guide books for eradicating open defecation in Jharkhand through the Nirmal Bharat Abhiyan (NBA) and state's own programmes.

As former minister in charge of drinking water and sanitation in the BJP-led government, Soren had announced that every village in Jharkhand will get a water pipeline by 2017. However, on Wednesday as head

Chief minister Hemant Soren takes a look at a low cost toilet model, in Ranchi on Wednesday.

DIWAKAR PRASAD/HT PHOTO

of government, Soren accepted that at present work needs to be speeded up.

Assuring the audience of quick progress, drinking water and sanitation minister Jai Prakash Bhai Patel, said that the state was implementing

projects effectively under the Centre's NBA.

"There are villages which have been declared free from open defecation. There will be more and those performing well have been assured of pipeline facility," said Patel.

On the occasion, the state government gave mementoes to the Yuwa girls' team and their coach Franz Gastler for their performance in the Donostia Cup and Gasteiz Cup in Spain and their maiden voyage to the United States of America for training.

THERE ARE VILLAGES WHICH HAVE BEEN DECLARED-FREE FROM OPEN DEFECATION. THERE WILL BE MORE AND THOSE PERFORMING WELL HAVE BEEN ASSURED OF PIPELINE FACILITY.

JAI PRAKASH BHAI PATEL, drinking water and sanitation minister

The government announced the projects will start in eight villages of Ormanjhi where members of the Yuwa team live.

Additional chief secretary Sudhir Prasad said "Solving problems of sanitation and drinking water can help Jharkhand become healthier. The Human Development Index is low because of stunting and malnutrition. The DWSD has major role as a problem solver.

Deepika face of state sanitation dept

State Plans 1.5L Toilets By March Next Year

Saurav Mukherjee | TNN

Ranchi: Parents of archer Dipika Kumari, who is named the brand ambassador for state's sanitation department, received a cheque of Rs 4.62 lakh from Chief Minister Hemant Soren for the construction of public toilet in their village in the city on the occasion of World Toilet Day organized by the state drinking water and sanitation department and Unicef.

Construction of public and household toilets in the villages will soon be brought under the purview MGNREGA. This has been done to improve the poor condition of state's sanitation system.

The state which has only 8% of its population using toilets for defecation, suffers from malnutrition and other

Hemant Soren gives appreciation letters to archer Deepika Kumari's (inset) parents in Ranchi on Wednesday

cleanliness related diseases. The drinking water and sanitation department of the state has launched a plan for constructing 1.5 lakhs toilets by March 2014.

At the event additional chief secretary Sudhir Prasad on Wednesday said, "Toilets will be constructed in eight villages in the city, including Hutup and others, within three months. We started the open defecation-free villages pro-

gramme in Gadri and Hutur as an experiment. After its success we are planning to implement it throughout the state."

State director for Unicef Job Zakaria said, "We have a plan to construct 60 lakh toilets by 2022 with the help of revolving fund provided by the state. The people in the state are suffering from diseases because of their habits and lack of awareness about sanitation. With the help of

revolving fund, our work of constructing toilets in villages has become much simpler. I hope this scheme will continue even after the government changes."

Soren said, "Though there are enough funds for the construction of household and public toilets, we lag behind because people here are unaware. Also, we have planned to remove VAT from rural pan so that toilets can be constructed at every village in the state. From now onwards provision for toilets in Indra Awas will be mandatory."

Speaking at the event, minister Jai Prakash Bhai Patel, said, "I agree that the condition should improve and for that the department is working with Unicef. Drinking water project for Ulahatu village where Birsu Munda took birth will soon be launched. Under the Nirmal Bharat scheme, the department is using the revolving fund for better results and for the construction of toilets. About 80% fund is provided by the department and 20% by the panchayat. The government has a plan that by 2017 each house of the state will have their own toilets and proper drinking water facility.

स्वच्छता मिशन को ले आयोजित कार्यक्रम में तीरदज दीपिक के माता-पिता के चार लाख बासठ हजार का चेक सौंपा गया। कार्यक्रम में युवक को अभिर्यता व नियुक्ति पत्र देते मुख्यमंत्री हेमंत सोरेन। साथ में उपस्थित पेयजल एवं स्वच्छता मंत्री जयप्रकाश भाई पटेल, युनिसेफ के जाँब जकारिया व अन्य।

घर में शौचालय जरूरी

रांची | हिन्दुस्तान ब्यूरो

मुख्यमंत्री हेमंत सोरेन ने कहा है कि जिनके घर में टॉयलेट होगा, वही मुखिया बन सकेगा। यह प्रावधान भी किया जा सकता है। सीएम बुधवार को होटल बीएनआर में विश्व शौचालय दिवस कार्यक्रम में बोल रहे थे।

हेमंत ने कहा कि इंदिरा आवास में भी शौचालय का प्रावधान होगा। सरकार इस पर भी विचार कर रही है। शौचालय पैन में बैठ के कारण कीमत अधिक होती है। बैठ माफ करने पर भी बात होगी।

2017 तक गांवों में पहुंचेगा स्वच्छ पानी : मुख्यमंत्री ने कहा कि 2017 तक सभी गांवों में स्वच्छ पानी पहुंच जाएगा। हैंडपंप की व्यवस्था खत्म होनी चाहिए। मिनी सप्लाय स्क्रीम की रफ़्तार बढ़ाने का उन्होंने निर्देश दिया।

योजनाओं को कागजों में न घुमाएँ : मुख्यमंत्री ने कहा कि योजनाओं को कागजों में न घुमाएँ। आम व्यक्ति को इससे जोड़ें, खरना सरकार कार्रवाई करेगी। जन प्रतिनिधियों का पूरा सिस्टम खड़ा हो गया है। अब सरकार और जन प्रतिनिधियों को एक साथ काम करना होगा। ग्रामीण क्षेत्रों को स्वच्छता अभियान से जोड़ें। सरकार राशि दे रही है।

शौचालय का न होना दुर्भाग्यपूर्ण : बकौल सीएम राज्य में मात्र सात से आठ फीसदी शौचालय का होना दुर्भाग्यपूर्ण है। घर-घर में इस व्यवस्था को चालू का करने का हल खोजा जा रहा है। कुछ हो न हो, शौचालय की व्यवस्था होनी चाहिए।

मौके पर मुख्यमंत्री ने पेयजल स्वच्छता विभाग की पस्तिका का लोकार्पण भी किया। कार्यक्रम में युनिसेफ के झारखंड प्रमुख जाँब जकारिया, अपर मुख्य सचिव सुधीर प्रसाद, निदेशक प्राथमिक शिक्षा ममता, निदेशक स्वास्थ्य सुमंत मिश्र सहित अन्य पदाधिकारी उपस्थित थे। ● देखें पेज 2 भी

बुधवार को रांची में विश्व शौचालय दिवस कार्यक्रम का सीएम ने उद्घाटन किया।

दो दिन बीडीओ-सीओ लगाएंगे जनता दरबार

नेमरा। दादा स्व सोबरन सोरेन के 56वें शहादत दिवस पर बुधवार को नेमरा पहुंचे हेमंत सोरेन ने सभी प्रखंडों में सप्ताह में दो दिन बीडीओ-सीओ द्वारा जनता दरबार लगा कर ग्रामीणों की समस्याओं का समाधान करने की घोषणा की।

उन्होंने कहा कि खिलाड़ियों के बेहतर प्रदर्शन पर नीकरी दी जाएगी। पारा शिक्षकों के बारे में 10-15 दिन में महत्वपूर्ण निर्णय होगा। पंचायतों को 10-10 लाख रुपए दिए जाएंगे। गांव का विकास वहां के बेरोजगार ही करेंगे। 65 वर्ष से अधिक सभी वृद्धाओं को पेंशन मिलेगी।

रांची : विश्व शौचालय दिवस पर होटल बीएनआर में आयोजित कार्यक्रम में झारखंड की स्वच्छता नीति पर पत्रिका का

वैट मुक्त किया जाएगा टॉयलेट पैन

रांची : मुख्यमंत्री हेमंत सोरेन ने स्वच्छता मिशन को गति प्रदान करने के लिए टॉयलेट पैन को वैट से मुक्त करने की बात कही। कहा, शौचालय निर्माण की लागत कम करने के लिए सरकार टॉयलेट पैन से वैट समाप्त करने का प्रयास करेगी।

24 सहायक अभियंताओं को नियुक्ति पत्र

विश्व शौचालय दिवस के मौके पर मुख्यमंत्री हेमंत सोरेन ने पेयजल एवं स्वच्छता विभाग के नवनियुक्त 24 सहायक अभियंताओं को नियुक्ति पत्र वितरित किए।

राज्य को हर साल हो रहा 10 हजार करोड़ का नुकसान

यूनिसेफ के जॉब जकारिया की मानें तो शौचालय के अभाव में प्रतिवर्ष राज्य को 10 हजार करोड़ का नुकसान हो रहा है। प्रति परिवार 15 हजार रुपये सिर्फ बीमारी के इलाज में खर्च हो रहे हैं। शिशु मृत्यु दर का मुख्य कारण खुले में शौच है। 9000 बच्चे हर साल डायरिया से पीड़ित होते हैं और करीब 8000 की असमय मृत्यु हो जाती है। उन्होंने अध्ययन का हवाला देते हुए बताया कि हमारे देश व राज्य में लोगों की लंबाई न बढ़ने का मुख्य कारण अनुवांशिक नहीं बल्कि स्वच्छता का अभाव है।
